

The Skill Craftsmanship, People, and Future of Tsugi.

Tsugi-Craft

by TOYOTA UPCYCLE

Tsugi-Craft

by TOYOTA UPCYCLE

The automobile manufacturing process produces leather remnants, scraps, and Offcuts.

We breathe new life into materials that have lost their way.

This is how Tsugi-Craft by TOYOTA UPCYCLE came to be.

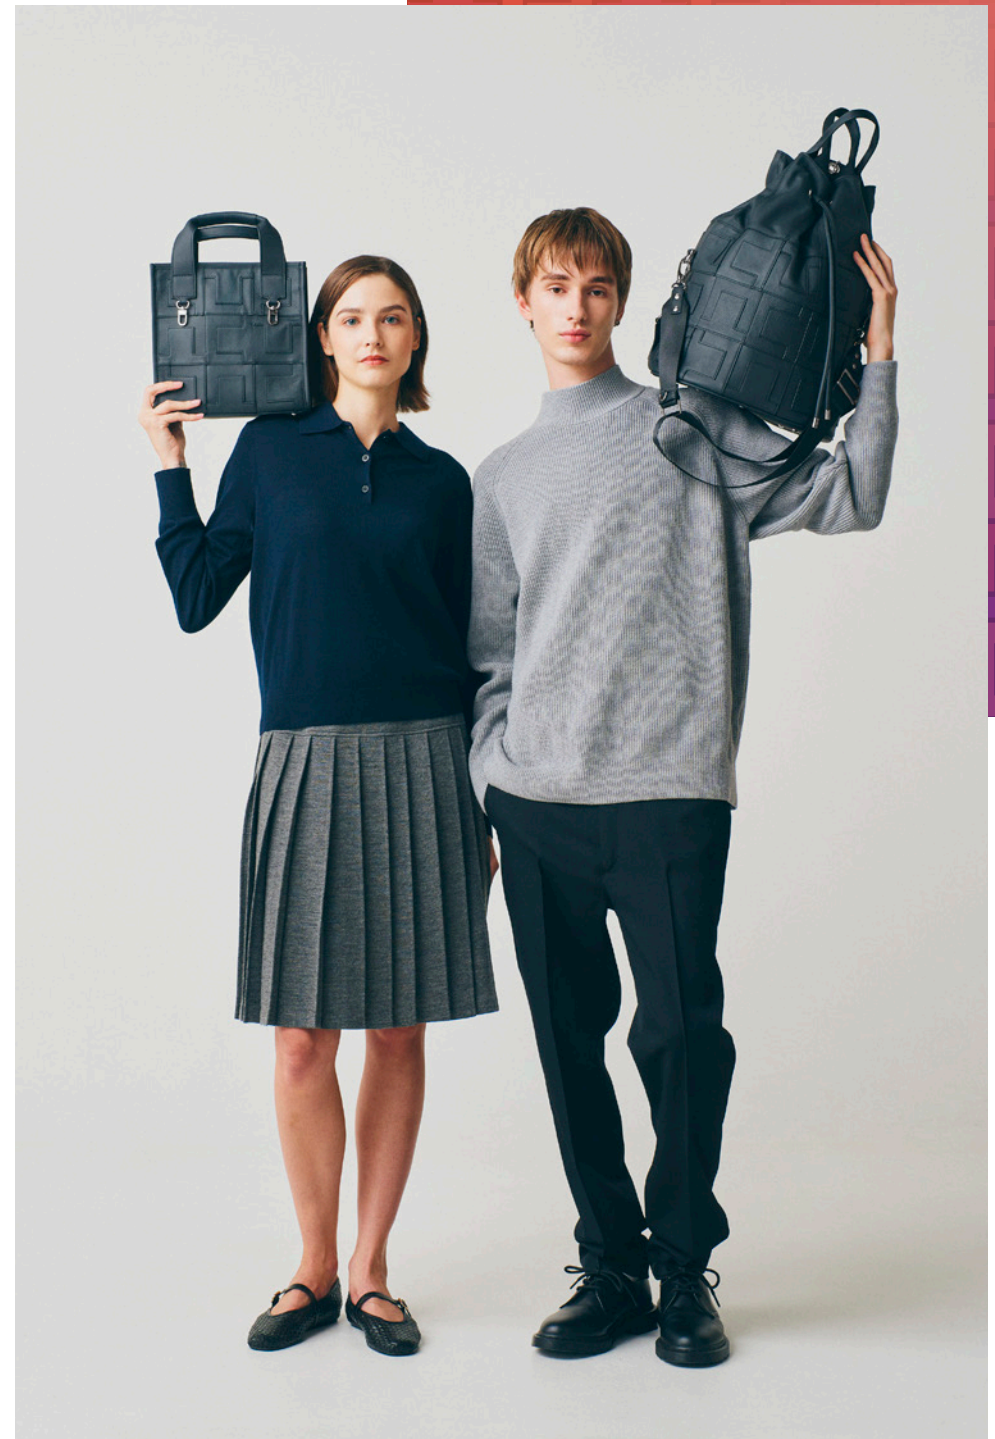

The word tsugi represents our philosophy of continuing, joining together, and living on into the future.

Tsugi-Craft is a unique approach to craftsmanship that combines the detailed handwork of Japanese sewing factories with the Toyota Motor Corporation expertise in manufacturing industrial products. This fusion of ancient wisdom and modern techniques transforms leather cast-offs into premium merchandise.

Upcycling has become an important movement in the approach to eco friendly and casual.

We chose to go a step further, staking out our own space in the premium category through upcycling.

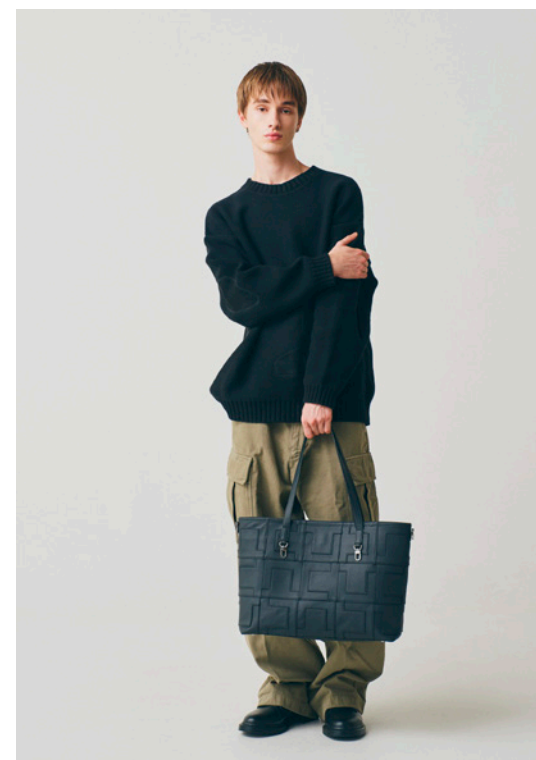

Tsugi-Craft by TOYOTA UPCYCLE is a new choice in premium upcycling.

Hight 30cm / Width 40cm / Depth 10cm

Measurements are taken with the product laid flat in its natural shape,
without stretching or expanding it.

Hight 45cm / Width 32cm / Depth 21.8cm

Measurements are taken with the product laid flat in its natural shape, without stretching or expanding it.

15-Pouch Large

Hight 38cm / Width 28cm / Depth 20cm

**Measurements are taken with the product laid flat in its natural shape,
without stretching or expanding it.**

15-Pouch Medium

Hight 23cm / Width 21cm / Depth 12cm

Measurements are taken with the product laid flat in its natural shape, without stretching or expanding it.

6-Pouch

Hight 30cm / Width 30cm / Depth 10cm

Measurements are taken with the product laid flat in its natural shape,
without stretching or expanding it.

9-Handbag Large

Hight 25cm / Width 25.5cm / Depth 9cm

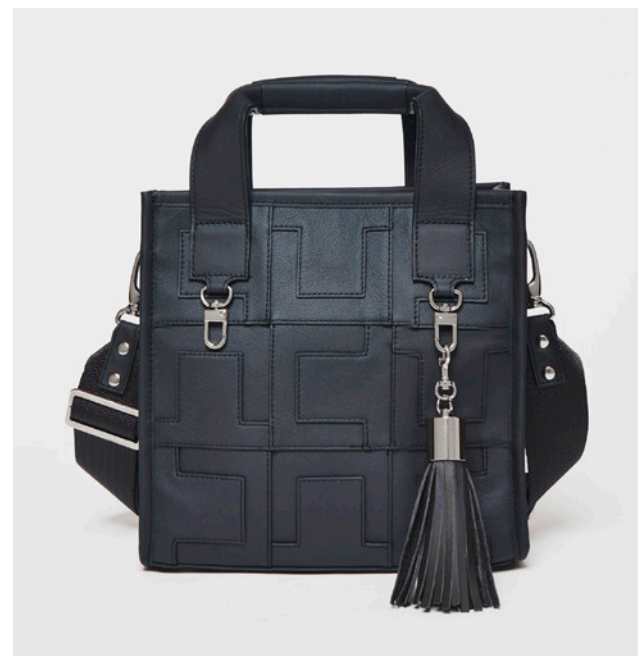

**Measurements are taken with the product laid flat in its natural shape,
without stretching or expanding it.**

Size Guide Notes

Measurements & Weight

- Measurements are listed in centimeters (cm).
- All items are measured externally while laid flat on a level surface.
- Due to the production process, slight variations of 1–2 cm may occur between individual items.

Measurement Points

- Measurements are taken with the product laid flat in its natural shape, without stretching or expanding it.
- The depth (gusset) is measured at the widest point in the center of the bottom panel.
- Accessories are not included in the measurements.
