- (1) Changes in significant subsidiaries during the current period
(Changes in specified subsidiaries that caused a change in the scope of consolidation)

None

- (2) Simplified accounting procedures and accounting procedures specific to quarterly consolidated financial statements

Provision for income taxes

The provision for income taxes is computed by multiplying quarterly income before income taxes and equity in earnings of affiliated companies by estimated annual effective tax rates. These estimated effective tax rates reflect anticipated investment tax credits, foreign tax credits and other items including changes in valuation allowances, that are expected to affect estimated effective tax rates.

- (3) Changes in accounting principles, procedures, and disclosures for quarterly consolidated financial statements

In June 2009, the Financial Accounting Standards Board ("FASB") issued updated guidance of accounting for and disclosure of transfers and servicing. This guidance eliminates the concept of a qualifying special-purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosures about transfers of financial assets. Toyota and its consolidated subsidiaries ("Toyota") adopted this guidance from the interim period within the fiscal year begun after November 15, 2009. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.

In June 2009, FASB issued updated guidance of accounting for and disclosure of consolidation. This guidance changes how a company determines when a variable interest entity should be consolidated. Toyota adopted this guidance from the interim period within the fiscal year begun after November 15, 2009. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.
