3. Other Information

- (1) Changes in significant subsidiaries during the current period
(Changes in specified subsidiaries that caused a change in the scope of consolidation)

None

- (2) Simplified accounting procedures and accounting procedures specific to quarterly consolidated financial statements

Provision for income taxes

The provision for income taxes is computed by multiplying quarterly income before income taxes and equity in earnings of affiliated companies by estimated annual effective tax rates. These estimated annual effective tax rates reflect anticipated investment tax credits, foreign tax credits and other items, including changes in valuation allowances, that are expected to affect estimated annual effective tax rates.

- (3) Changes in accounting principles, procedures, and disclosures for quarterly consolidated financial statements

In July 2013, the Financial Accounting Standards Board issued updated guidance on uncertain tax positions. This guidance requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward for tax purposes, a similar tax loss, or a tax credit carryforward. The parent company and its consolidated subsidiaries ("Toyota") adopted this guidance from the interim period within the fiscal year, begun after December 15, 2013. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.
