4. Other

- (1) Changes in significant subsidiaries during the current period
(Changes in specified subsidiaries that caused a change in the scope of consolidation)

XTMCA Ltd., which was a specified subsidiary, has been liquidated on October 13, 2009.

- (2) Simplified accounting procedures and accounting procedures specific to quarterly consolidated financial statements

Provision for income taxes

The provision for income taxes is computed by multiplying income before income taxes and equity in earnings of affiliated companies by estimated annual effective tax rates. These estimated effective tax rates reflect anticipated investment tax credits, foreign tax credits and other items including changes in valuation allowances, that are expected to affect estimated effective tax rates.

(3) Changes in accounting principles, procedures, and disclosures for quarterly consolidated financial statements

In December 2007, the Financial Accounting Standards Board ("FASB") issued updated guidance of accounting for and disclosure of business combinations. This guidance establishes principles and requirements for how the acquirer recognizes and measures the identifiable assets acquired, the liabilities assumed, any noncontrolling interest, and the goodwill acquired in a business combination or a gain from a bargain purchase. Also, this guidance provides several new disclosure requirements that enable users of the financial statements to evaluate the nature and financial effects of the business combination. Toyota and its consolidated subsidiaries ("Toyota") adopted this guidance from the business combinations on and after the beginning of fiscal year begun on or after December 15, 2008. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.

In December 2007, FASB issued updated guidance of accounting for and disclosure of consolidation. This guidance establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. Toyota adopted this guidance from the interim period within the fiscal year begun on or after December 15, 2008. As a result, noncontrolling interest, formerly reported as minority interest, is reported as shareholders' equity in the quarterly consolidated balance sheets, and the amount of net income attributable to the parent and to the noncontrolling interest are identified and presented in the quarterly consolidated statements of income. Since the presentation and disclosure requirements have been applied retrospectively for all periods presented in the consolidated financial statements in which this guidance is applied, certain prior year amounts have been reclassified to conform to this guidance. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.

In April 2009, FASB issued updated guidance of accounting for and disclosure of investments. This guidance revises the recognition and presentation requirements for other-than-temporary impairments of debt securities, and contains additional disclosure requirements related to debt and equity securities. Toyota adopted this guidance from the interim period ended after June 15, 2009. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.

In May 2009, FASB issued updated guidance of accounting for and disclosure of subsequent events. This guidance is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. Toyota adopted this guidance from the interim period ended after June 15, 2009. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.
