### 3. Other Information

- (1) Changes in significant subsidiaries during the current period  
(Changes in specified subsidiaries that caused a change in the scope of consolidation)

None

- (2) Simplified accounting procedures and accounting procedures specific to quarterly consolidated financial statements

Provision for income taxes

The provision for income taxes is computed by multiplying income before income taxes and equity in earnings of affiliated companies for the first nine months by estimated annual effective tax rates. These estimated annual effective tax rates reflect anticipated investment tax credits, foreign tax credits and other items, including changes in valuation allowances, that are expected to affect estimated annual effective tax rates.

- (3) Changes in accounting principles, procedures, and disclosures for quarterly consolidated financial statements

In December 2011, the Financial Accounting Standards Board (“FASB”) issued updated guidance of disclosures about offsetting assets and liabilities. This guidance requires additional disclosures about gross and net information for assets and liabilities including financial instruments eligible for offset in the balance sheets. The parent company and its consolidated subsidiaries (“Toyota”) adopted this guidance from the interim period within the fiscal year, begun on or after January 1, 2013. The adoption of this guidance did not have a material impact on Toyota’s quarterly consolidated financial statements.

In February 2013, FASB issued updated guidance on the presentation of items reclassified out of accumulated other comprehensive income. This guidance requires to present, either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified out of each component of accumulated other comprehensive income based on its source. Toyota adopted this guidance from the interim period within the fiscal year, begun after December 15, 2012. The adoption of this guidance did not have a material impact on Toyota’s quarterly consolidated financial statements.

In July 2013, FASB issued updated guidance which permits the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) to be used as a benchmark interest rate for hedge accounting purposes. This guidance also removes the restriction on using different benchmark rates for similar hedges. Toyota adopted this guidance for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. The adoption of this guidance did not have a material impact on Toyota’s quarterly consolidated financial statements.
