Editorial Policy

The Sustainability Data Book explains Toyota's sustainability approach and policies for ESG initiatives along with practical cases and numerical data, as a medium for specialists and those who are particularly interested in sustainability issues.

Since fiscal 2021, the Sustainability Data Book, which had conventionally been released annually, has been updated whenever necessary so that the information can be disclosed in a timely manner.

Period Covered

Focusing mainly on the results of initiatives implemented during the previous fiscal year, the contents are updated as necessary throughout the year. For update history, please see the following page.

Scope of Report

This Book introduces the initiatives and activities of Toyota Motor Corporation and its consolidated subsidiaries etc. in Japan and overseas. The scope of data covered is described in each section.

Toyota References in This Document

Toyota Motor Corporation:
Information on or initiatives of Toyota Motor Corporation

Toyota:
Information on or initiatives of Toyota Motor Corporation and its consolidated subsidiaries

Reference Guidelines

- Task Force on Climate-related Financial Disclosures (TCFD)
- Sustainability Accounting Standards Board
- ISO 26000 Guidelines

Third Party Assurance

Denotes data assured by an Independent Practitioner

Disclaimer

This report includes not only past and current facts pertaining to Toyota Motor Corporation and other companies within the scope of coverage of the report, but also plans and projections at the time of its publication as well as forecasts based on management policies and strategies. These forecasts are assumptions or determinations based on information available at the time they are stated, and the actual results of future business activities and events may differ from the forecasts due to changes in various conditions. In cases where information provided in prior reports is corrected or restated and in cases where material changes occur, the details thereof will be indicated in this report. The readers' understanding about this point would be appreciated.

Overview of Toyota Motor Corporation

Company Profile

Company Name: Toyota Motor Corporation
President and Representative Director: Akio Toyoda
Company Address: Head Office: 1 Toyota-cho, Toyota City, Aichi Prefecture, Japan
Nagoya Office: 4-7-1 Meieki, Nakamura-ku, Nagoya City, Aichi Prefecture, Japan
Founded: August 28, 1937
Capital: 635.4 billion yen (as of the end of March, 2022)
Main Business Activities:
- Automotive business
- Financial services (vehicle loans and leasing, etc.)
- Other operations (information technology, etc.)

No. of Employees: 372,817 (as of the end of March, 2022)
No. of Consolidated Subsidiaries: 559 (as of the end of March, 2022)
No. of Associates and Joint Ventures Accounted for by the Equity Method: 169 (as of the end of March, 2022)

Vision & Philosophy
For details of our Vision & Philosophy, please see our official website.

Financial Data
For our major financial data, please see our official website.
### Fundamental Approach

**Aim**
- Contributing to the creation of a prosperous society through our business activities based on the Guiding Principles at Toyota while continuing to uphold the spirit of the Toyota Principles, which we have inherited since our foundation.
- Aiming to be the "best company in town" that is both loved and trusted by local people to achieve the mission of "Producing Happiness for All" under the Toyota Philosophy compiled in 2020.

**Initiative**
- Advancing initiatives based on our Sustainability Fundamental Policy and individual policies and guidelines.

### Organizational Structure

**Aim**
- Addressing issues of greater importance and urgency on a priority basis while grasping, for example, changes in the external environment and social needs.

**Initiative**
- In 2019: Set up the Sustainability Management Department.
- Continuously promoting and improving our sustainability activities, such as environmental, social, and governance initiatives, while working in close liaison with relevant departments.
- In 2020: Appointed a Chief Sustainability Officer (CSO) as the leader of the promotion of sustainability activities.
Materiality (key issues)

Aim

Identifying key issues to sustainably enhance our own corporate value while contributing to society in view of the ever-changing social trends, external voices, and increasingly diversified, complicated issues.

Initiative

• Promoting initiatives to realize the six key issues (materiality).

Process of identification

Listing issues

- Major references:
  - International guidelines, norms (GRI, SASB, SDGs, etc.)
  - Priority items of evaluation organizations
  - Trends inside and outside Japan
  - Risk and opportunity perspective

Evaluation from internal and external viewpoints

- External:
  - Priority items for investors or evaluation organizations
  - Opinions obtained through communication with stakeholders
  - Internal
    - Factors we have cultivated so far (founding spirit)
    - Anticipated environmental changes (transformation into a mobility company)

Evaluation from social viewpoints

- Value that Toyota can offer society
- Contribution to solving social issues (SDGs)

Discussion

- Discussion at Sustainability Meeting attended by Outside Directors and Audit and Supervisory Board Members

Enhancing corporate value

Contributing to society (SDGs)

Founding spirit

Factors that we should continue to maintain

- Principle: Five Main Principles of Toyoda
- Strengths: Capabilities and technologies of monozukuri (manufacturing), Toyota Production System, cost reduction, quality, many partners, etc.

Transformation into a mobility company

Factors that we should change or reinforce

- Business (financial): Adapt to CASE*
- Non-financial: Commit to ESG

* CASE: Connected, Autonomous/Automated, Shared, and Electric

Toyota’s SDGs

Aim

• Producing happiness for all individuals in the era of diversification, with a “YOU perspective” that sees the other side of the story.

Initiative

• Promoting initiatives based on the desire of working for the benefit of others, which has been passed on since our founding.

Examples

- Initiatives for the global environment
- Initiatives for a happier society
- Initiatives for working people

SUSTAINABLE DEVELOPMENT GOALS

SDGs Initiatives
Stakeholder Engagement

**Aim**
- Engaging in stakeholder-oriented management to contribute to sustainable development and striving to maintain and develop sound relationships with stakeholders through open and fair communication.

**Customers**
- Based on our “Customer First” policy, we take measures to incorporate the comments and opinions of customers into better products and services.
  - Toyota Customer Assistance Center (as needed)
  - Official website, product websites (as needed)
  - Information sharing through social media (as needed)

**Employees**
- Bilateral communications to build teamwork and foster a sense of unity based on a labor-management relationship grounded on mutual trust.
  - Joint labor-management roundtable conferences
  - Labor-management meetings (several times a year)
  - Employee satisfaction survey (once or twice every two years)

**Shareholders**
- Timely and appropriate disclosure of operation and financial results to shareholders and investors, and constructive dialogues toward sustained growth and enhancement of corporate value.
  - Shareholders’ Meeting (once a year)
  - Financial results announcement (four times a year)

**Business Partners**
- Close communication to achieve a mutually beneficial relationship based on mutual trust.
  - Various meetings, seminars, and events (as needed)
  - Supplier conventions, various meetings with supplier associations, seminars, and events (as needed)

**Local Communities/Global Society**
- Dialogue with various stakeholders to build good relationships with local communities and to solve global social and environmental issues.
  - Roundtable conferences with local residents (several times a year)
  - Participating in collaborative activities with NGOs and supplier associations, seminars, and events (as needed)
  - Various meetings, seminars, and events (as needed)

**Initiative**
- Holding dialogues with major stakeholders through Toyota’s relevant divisions and offices around the world.
- Disseminating information about Toyota’s initiatives through dialogues with external experts to examine, for example, the direction of our sustainability-related initiatives, and through speech delivery at external lecture meetings.

**Overview**
- Promoting Sustainability

**Toyota’s SDGs**
- World Business Council for Sustainable Development (WBCSD)
- Recognizing social needs in individual regions
- Introducing policies to improve the stability of the nation/industries

**P.16 Stakeholder Engagement (Human Right)**
- Engaging with stakeholders (Human Right)
Public Policy

Aim

- Carrying out Toyota’s mission “Producing Happiness for All” and aiming to be the No. 1 company in the community, loved and relied on by local residents.
- For example, in terms of climate change, it is very important to expand the use of electric vehicles worldwide. In the process of achieving this objective, governments and the authorities concerned have a crucial role in developing energy policies and infrastructure. Working and learning together with stakeholders, Toyota will maximize its contribution to local communities and the development of public policies in consideration of policies, social needs, technological advancement, and various customer needs while always bearing transparency and compliance in mind.

Initiative

- Building good relationships with governments and their administrative agencies, regulators, political parties, NGO, local communities, customers, and other stakeholders.
- Participating in economic organizations and industry associations around the world and many officers and employees are involved in and contribute to formulating policy recommendations.
- Disclosing Toyota’s Views on Climate Public Policies
- Being more transparent about our activities, building and increasing trust with the public, and further strengthening cooperation between all stakeholders by summarizing our views on key climate-related policies and providing an overview of the industry associations to which we belong.

Policy and Environmental Management

Fundamental Approach

Aim
- Reduce the environmental footprint and contribute to the sustainable development of society and the world throughout all areas of our business activities.
- Build close, cooperative relationships with a wide spectrum of individuals and organizations involved in environmental preservation.

Initiative

Toyota Earth Charter
- Conducting continuous environmental initiatives since the 1960s.
- Formulated our long-term initiatives for the global environment by 2050 as the Toyota Environmental Challenge 2050, in 2015.* Subsequently advancing various initiatives centered on this.

Environmental Management

Aim
- To achieve sustainable development together with society, establish the environmental management system with consolidated subsidiaries to ensure through risk management and compliance and maximize environmental performance.
- Always improve the management system and quickly respond to changes in environmental issues including worsening climate change.

Initiative

Establish an Environmental Management System
- Establish strategies, policies and approaches in each field under the lead of the three committees of the Environmental Product Design Assessment Committee, the Production Environment Committee, and the Resource Recycling Committee, under the supervision of the Board of Directors.
- Share our target with the following companies and proceed with environmental management
- Consolidated subsidiaries on a financial accounting basis (493 companies).
- Unconsolidated vehicle production companies (9 companies).
- Set environmental affairs offices in the six regions (North America, Europe, China, Asia, South America, and South Africa) and proceed with global environmental efforts with consideration given to local conditions.

Global Environmental Management Framework
Certification as of 2021
- ISO 14001: All plants of Toyota Motor Corporation and consolidated subsidiaries (122 companies)
- ISO 50001: 8 of the above companies

Risk Management and Compliance
- Take the following actions at the operating bases of Toyota Motor Corporation and consolidated subsidiaries:
  - Implement preventive measures
  - Undertake risk management in accordance with criteria that meet or exceed laws and regulations
  - Have systems in place, just in case, to respond to a violation or a complaint in a timely manner, and if such a situation occurs, work to prevent reoccurrence through identification of root causes
  - Conduct mutual learning for plants by sharing practices among Toyota Group companies

Maximize Performance
- Proceed with initiatives to address climate change, resource recycling, and harmony with nature based on the Toyota Environmental Challenge 2050.

Outside Evaluation for Our Commitment to Climate Change and Water Security
- CDP Corporate Research
  - Selected for inclusion in the A List, which is the highest evaluation for climate change and water security by the CDP (in December 2021).

Major Targets and Progress (excluding the initiatives to address climate change, recycle resources, and ensure harmony with nature)

<table>

</tbody>
</table>
Initiatives with Suppliers

Aim

• Work together with suppliers toward reducing the environmental footprint throughout the product life cycle based on the concepts of mutual trust and mutual benefit, thereby contributing to accomplishing a sustainable society.

Initiative

Green Purchasing* Policy

Implementation of the Green Purchasing Guidelines

• Ask all tier 1 suppliers, including new suppliers, to implement basic initiatives based on the TOYOTA Green Purchasing Guidelines (the "guidelines"), and also deploy and enlighten the guidelines to all tier 2 and subsequent suppliers so that the guidelines will take root.

• Ask through the guidelines that initiatives be taken toward reducing the environmental footprint at each company's production plants and throughout the product life cycle, and that related legal compliance be ensured.

• Overseas Practices related to the Green Purchasing Policy

• Ask the purchasing base in each region to implement the guidelines in line with local conditions and make continuous efforts.

Cases

Toyota Motor North America (North America)

• Updated the existing guidelines and issued the Green Supplier Requirements in April 2021, and reinforced environmental management by including compliance with requirements (CO2 emission reductions) in the terms and conditions.

* Prioritizing the purchase of parts, materials, equipment and services with a low environmental footprint when manufacturing products

CDP Supply Chain Program

• Introduced the CDP Supply Chain Program in 2015 to support continuous environmental initiatives conducted with suppliers, enabling us to determine the supplier's risks, opportunities and initiatives on climate change and water security.

• Create opportunities for environmental communication by annually holding briefing sessions and response guidance where we share information on social trends and Toyota's environmental policies, and provide feedback on response results, with the number of participating suppliers increasing every year.

2021 Results

• Received responses from suppliers accounting for approximately 83 percent of the total purchasing value by Toyota Motor Corporation.

• Approximately 64 percent of these suppliers reduced their CO2 intensity (per unit of net revenue) compared to the previous year. (Affected by the sluggish production due to the COVID-19 pandemic, the fluctuation rate was greater than that of the previous year.)

Monitoring

Self-assessment Sheet

• Use a self-assessment sheet to confirm the status of initiatives by each company and share the results.

FY2022 Results

• Received responses from 227 main companies in Japan and provided feedback on the scoring results.
Initiatives toward Reducing CO₂ Emissions

- Towards carbon neutrality throughout the product life cycle, started to investigate concrete CO₂ reduction measures by presenting CO₂ reduction guidelines tailored to each supplier.

2025 Target
- Work with major suppliers in each country and region toward reducing CO₂ emissions.
- Regions in scope: Regional head offices with a purchasing function (in Japan, North America, Europe, China, Asia, South America and South Africa)

2021 Results
- Steadily accomplished the target set in each country or region.

Risk Management

Ensuring Compliance with Regulation Concerning REACH¹ and Other Global Regulations on Chemical Substances

- Comply with laws and regulations on chemical substances in various countries and regions, such as the Chemical Substances Control Law² in Japan, and the Directive on ELV³ and Regulation concerning REACH of the European Union (EU).
- Improve structures and undertake operational management in cooperation with all parties involved in conveying chemical substance information.
- Continue industry collaboration and global deployment and comprehensive implementation of action standards tailored to the cultures and industrial structures of each region.

FY2022 Results
- Revised regulations based on the Global Automotive Declarable Substance List (GADSL) to reflect the latest laws and regulations in each country (setting content rate targets for each substance in consideration of regulatory requirements, etc.).
- Steadily introduced vehicles that satisfy these regulations, and also began to work in cooperation with European affiliates to address data registration regulations (WFD⁴/SCIP⁵) newly launched in Europe.
- Conducted supplier awareness activities (361 companies) using self-assessment check lists to ensure thorough management of chemical substances, and continued to expand activities to other regions.

Environmental Due Diligence at the Time of Purchasing

- Policies and Approaches to Responsible Mineral Sourcing
- Established the Policies and Approaches to Responsible Mineral Sourcing in accordance with the OECD guidance to take into account the impact on local societies by the procurement of minerals that may cause social problems regarding human rights and environment.
- Due Diligence Policy
- Identify and assess risks in the supply chain together with suppliers, and if any risk is identified, implement appropriate measures that will lead to the mitigation of the risk.

Supplier Hotline

- Set up a supplier hotline in accordance with the Toyota Code of Conduct and Toyota Basic Purchasing Policies, which call on suppliers to comply with laws and regulations and to take fair and just actions, in order to allow suppliers to report any action violating environmental laws, regulations, or business manners that may have occurred in the supply chain, while assuring anonymity.

---

¹ OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-affected and High-risk Areas
² Act on the Regulation of Manufacture and Evaluation of Chemical Substances: An act to prevent environmental pollution caused by chemical substances that pose a risk of impairing human health and interfere with the inhabitation and growth of flora and fauna
³ Directive on End-of Life Vehicles: A directive designed to reduce the load of end-of-life vehicles on the environment
⁵ Database of Information on Substances of Concern in articles, as such or in complex objects [Products]
Awareness-raising Activities

Training for Purchasing Group Personnel
- Provide group training for new employees regarding sustainability including the environment.
- Organize periodic study groups regarding carbon neutrality for staff who communicate directly with suppliers.

Training Sessions with Suppliers
- A variety of practical opportunities established by Toyota and its suppliers for joint training on environmental issues.

Initiatives by Kyohokai*
- Established research groups that consider environmental topics in 2019.
- Organized working groups for four themes in 2021, and actively exchanged information and held discussions for mutual learning by, for example, inviting speakers from leading companies and holding on-site review meetings. Issued a final report to the entire Kyohokai in March 2022.

Initiatives through Supplier Briefings
- Hold periodic supplier briefings where we share information on environmental trends and Toyota’s environmental policies.
- Organized an explanatory session in FY2022 for promoting activities to reduce CO2 emissions from items, and shared the goal of realizing carbon neutrality by 2050, thereby accelerating our efforts toward the accomplishment.

Recognition of Supplier’s Environmental Initiatives
- Annually present the Environmental Activity Awards, established in 2017 to commend suppliers that conduct exceptional environmental initiatives.

Initiatives with Dealers and Distributors

Aim
- Work together with dealers and distributors toward reducing the environmental footprint, help them earn trust from their local communities and serve as the “Best-in-Town”, and contribute to the communities and customers.

Initiative

Implement the Environmental Global Policy in the Sales and Service Area
- Continuing to implement a strategy to reduce the environmental footprint in store operations since 2016.

Regions
- Dealers in 54 major countries and regions, such as Japan, North America, Europe, Asia, Latin America, Oceania, and Africa (approximately 13,000 stores, accounting for 92 percent of the total in terms of the number of vehicles sold).

Actions
- Establish a structure of environmental management system
- Minimize environmental risks
- Improve environmental performance
- Activities to make environment better with customers and society

Initiatives to Reduce CO2 Emissions

2025 Target
- 100 percent introduction rate for CO2 reduction items at newly constructed and remodeled dealers.

2021 Results
- Achieved the target in 41 countries and regions, and proceeding with initiatives toward achieving the target in other countries and regions.

---

* Voluntary organization consisting of more than 200 suppliers delivering automotive components, bodies, etc. to Toyota Motor Corporation.
Stakeholder Engagement

Aim

- Establish positive relationships with governments and their administrative agencies, regulators, political parties, non-profit organizations, local communities, customers, dealers, suppliers, and employees.
- Contribute and commit to public policy by participating in activities by industry and economic associations, and other initiatives.

Initiative

U.S. and Europe

- U.S.: Participate in the Suppliers Partnership for the Environment*1 and promote environmental initiatives where suppliers, governments, NGOs and other stakeholders collaborate.
- Europe: Address key sustainability issues in the supply chain as a member company of CSR Europe’s*2 Drive Sustainability,*3 an automobile industry partnership program.
- Participate in the WBCSD*4 and apply what we learn through participation in a traffic flow improvement verification program in Thailand, and other projects, to our efforts to contribute to the realization of a sustainable society.

Note 1. A U.S.-based public-private partnership program for automobile manufacturers and suppliers to promote sustainability

Note 2. A European NPO that operates a European business network to promote corporate sustainability

Note 3. A European partnership NPO that promotes sustainability in the automobile industry

Note 4. World Business Council for Sustainable Development: An NGO that conducts advocacy and verification projects to realize a sustainable society with the participation of major corporations worldwide

Cases

Japan

- Engage in public relations and present recommendations by ourselves or through industry and economic associations regarding climate public policies, such as those related to the Paris Agreement, the accomplishment of carbon neutrality, and the stable supply of low-cost renewable energy.

Representative Affiliation:

- Japan Automobile Manufacturers Association, Inc. (JAMA)
- Japan Business Federation (KEIDANREI)

Public Policy

Toyota Argentina S.A. (Argentina)

- Ensured that all dealers in Argentina were ISO 14001 certified.
- Launched the original environmental program “Eco Dealer Program” in 2018 with the involvement of all dealers.
- Gave certification to dealers in three phases according to their status of environmental management framework, achievement levels of CO2 reductions, etc.
- Held a monthly meeting to share best practices, for example, for saving energy and introducing renewable energy.
- Reduced CO2 emissions in FY2022 by 15 percent compared to 2018 levels at the dealers in Argentina as a result of the above initiatives.
Aim

- Through contributing to achieving carbon neutrality, aim to establish a sustainable society in harmony with nature.

Initiative

Toyota is committed to reducing CO₂ emissions in each stage of the vehicle life cycle.

* CO₂ emissions during driving as well as CO₂ emissions during the production stage of fuel and electricity (CO₂ emissions vary depending on the power supply configuration and hydrogen production method, in the case of battery electric vehicles and fuel cell electric vehicles).
**Aim**

- Achieve carbon neutrality by completely eliminate CO₂ emissions not only during driving but throughout the entire vehicle life cycle including materials/parts manufacturing, vehicle manufacturing, logistics, energy production, disposal and recycling.

**Initiative**

- Offer optimal products to minimize CO₂ emissions throughout the vehicle life cycle by taking into consideration the energy situations and composition ratios of power generation sources of each country/region.
- Accelerate measures for the development of technologies that contribute to CO₂ emissions reduction and create eco-friendly designs as we pursue “ever-better cars”.
- Step up efforts to reduce CO₂ emissions throughout the entire vehicle life cycle while engaging in even closer communication with various stakeholders in each stage of the value chain, including suppliers and dealers.

---

### Life Cycle Zero CO₂ Emissions Challenge

**Completely Eliminate All CO₂ Emissions Throughout the Entire Vehicle Life Cycle**

<table>

Promoting Environmental Management in the Vehicle Life Cycle

- Has been working to reduce CO2 emissions by adopting LCA methods with the aim of a clean car manufacturing throughout the vehicle life cycle.
- Promoting the environmental management by using the Eco Vehicle Assessment System (Eco-VAS), which was introduced in 2005, that sets environmental targets during the vehicle development stage under the guidance of the chief engineer and takes steady measures to achieve those targets.
- Achieved life cycle CO2 emission levels in all subject models equivalent to or lower than those of reference vehicles (previous models or vehicles of the same class).

E.g., • Reduced CO2 emissions of the NX350h by 16 percent compared to the previous model.

LCA Results of CO2 Reduction in the Vehicle Life Cycle for NX350h

Consideration in Each Stage of the Vehicle Life Cycle

- Toyota has been working, in cooperation with its stakeholders, to achieve carbon neutrality by 2050 by employing the Life Cycle Assessment (LCA) methods to measure CO2 emissions.
- Carbon neutrality in LCA means to achieve carbon neutrality for not only greenhouse gas (GHG) emissions during driving but all CO2 generated throughout the entire vehicle life cycle including materials, parts and vehicle manufacturing, logistics, energy production, disposal and recycling.

Each Stage of the Vehicle Life Cycle

- Well to Tank (WtT): From fuel extraction/production to a tank, or from power generation to filling a battery.
- Tank to Wheel (TtW): From start of an engine or motor to driving wheels.
- While gasoline vehicles emit CO2 during fuel production (WtT) and driving (TtW), battery electric vehicles (BEVs) do not emit CO2 during driving (TtW) but if fossil fuel is used, CO2 is generated during production of electricity (WtT) and production of batteries.
- To reduce CO2 emissions of BEVs, conversion to renewable energy is crucial. But the progress in conversion varies among countries and regions, making it difficult to achieve complete conversion. It is therefore not easy to achieve carbon neutrality only with BEVs. So, reduction of CO2 emissions from the existing powertrains, such as gasoline vehicles and hybrid vehicles, many of which are present in market, should also be promoted by introducing low-carbon synthetic fuels, such as biofuel and e-fuel.
Cases of Initiatives in Energy Production and Usage

**CO₂-free hydrogen production and usage for Woven City and beyond**

- On March 23, 2022, ENEOS and Toyota announced to jointly explore CO₂-free hydrogen production and usage at Woven City, the prototype city of the future that Toyota has started to develop in Susono City, Shizuoka Prefecture, Japan.
- The two companies have decided to commence construction and operation of a hydrogen refueling station to produce and supply CO₂-free hydrogen to Woven City and Fuel Cell Electric Vehicles (FCEVs).
- They are considering connecting the Community Energy Management System (CEMS*) of Woven City with the hydrogen EMS to optimize hydrogen production.

* Community Energy Management System

**Developing a hydrogen-based new city of the future**

- On June 4, 2021, Fukushima Prefecture and Toyota announced that they have commenced discussions with various partners over developing a city for a new future that makes use of hydrogen and technologies produced in Fukushima Prefecture.
- Creating first an implementation model for hydrogen-based deliveries at supermarkets and convenience stores, which play a role both as essential urban infrastructure and as evacuation areas in times of disaster, before embarking on a challenge to apply the model to cities nationwide.
- Introducing several fuel cell (FC) trucks for deliveries.
- Optimizing operational management and hydrogen refilling schedules through the use of connected technologies, and carrying out energy management that caters to the prevailing local conditions.
Initiatives in Logistics

- To achieve carbon neutrality throughout the entire vehicle life cycle, working to improve transport efficiency (reduce workload) and make use of low-carbon technologies (reduce CO₂ emissions intensity) in transport of production parts, completed vehicles, and supply parts covered by in-house logistics arrangements.

2021 Results
- CO₂ emissions in logistics in Japan: Down 8 percent from 2018
- CO₂ emissions in logistics overseas: CO₂ reduction activities tailored to local characteristics are being promoted

Case 1  Improving transport efficiency (reducing workload)

Joint logistics across suppliers through in-house logistics arrangements
- For logistics of production parts in Japan, based on the concept of retrieval system, a principle of Toyota Production System (TPS), gradually changing the conventional delivery system, which is arranged by suppliers, to the retrieval system, which is arranged by Toyota.
- By managing logistics from the perspective of the overall optimization, improving loading efficiency by combining the load of all suppliers and helps improve transport efficiency at supplier sites, thereby contributing to reduction of CO₂ emissions.
- Gradually increasing the regions and suppliers covered by the new system, from Kyushu to Tohoku, and to Tokai.

**Diagram:**
- Before kaizen (delivery system)
- After kaizen (pickup system)

Case 2  Making use of low-carbon technology (reducing CO₂ emissions intensity)

For land transport
- Commenced use of 25-meter tandem trailers to improve transport efficiency and as a solution to the shortage of drivers. (From March 2022: between Tahara and Hino, from June 2022: between Mikawa and Kyushu)
- Considering gradually expanding the application while advancing negotiations concerning the development of the operation routes.
- Taking on new initiatives for the practical use of new technologies, including hydrogen fuel cell electric trucks.

**Diagram:**
- 25-meter tandem trailer

For marine transport
- Introduced LNG-powered pure car carriers*2 to transport completed vehicles from Japan to North America.
- Added one vessel in 2021 (total three vessels).
- Further expansion is being discussed with shipping companies.

**Diagram:**
- LNG-powered pure car carriers

*2 CO₂ emissions per transport unit are reduced by 25 percent to 40 percent compared to earlier diesel ships.
Product

Aim

- Toward achieving the carbon neutrality, providing optimal products according to the situation of each country/region.
- Providing products that inspire customers to think, “this is easy to use” and “I want to drive this” based on a sustainable and practical approach.

Initiative

- Based on the idea that eco-friendly vehicles contribute to the environment only when they come into widespread use, enhance the lineups of electrified vehicles*1 and flex-fuel vehicles (FFV*2) and promote their spread.
- Strive to reduce average CO₂ emissions per vehicle during driving by 90 percent compared to 2010 levels by 2050.

New Vehicle Zero CO₂ Emissions Challenge

Reduce global³ average CO₂ emissions (TW) from new vehicles by 90 percent compared to Toyota’s 2010 levels by 2050

*³ Average fuel efficiency values in countries and regions below (excluding vehicles in the cargo category under fuel efficiency regulations, and trucks and buses)
- Japan, U.S., Europe, China, Canada, Brazil, Saudi Arabia, India, Australia, Taiwan, Thailand and Indonesia
- Consolidated subsidiaries are not included.

*² Tank to Wheel: CO₂ emissions during driving (CO₂ emissions during the production stage of the fuel and electricity are not included; TW emissions are zero in the case of battery electric vehicles and fuel cell electric vehicles)

Cumulative CO₂ Emissions Reduction Effects from Electrified Vehicles
Aiming at Carbon Neutrality through Product Development

Diverse solutions for diverse situations

- A wide range of vehicles, from passenger cars to commercial vehicles and from cars for people’s daily lives to luxury cars, are used in diverse situations, including not only urban areas but also countries and regions with underdeveloped infrastructure, especially in a severe environment, such as deserts and coal mines.
- Toyota has a variety of powertrain lineups of electrified vehicles, vehicles that convert electricity into power to move, such as HEVs, PHEVs, BEVs and FCEVs.
- In diversified markets of different countries and regions, there is no one-size-fits-all solution. Toyota therefore endeavors to propose various solutions and prepare as many options as possible for our customers.

BEV strategies

- Expand the options for achieving carbon neutrality by offering a full lineup of BEVs.
- Announced in December 2021 the plan to roll out 30 BEV models by 2030, globally offering a full lineup of BEVs in the passenger and commercial segments.
- Released the bZ4X, developed based on a dedicated platform for battery EVs, on May 12, 2022.

Development and supply of batteries

- While promoting a full lineup of electrified vehicles, we have also been developing a full lineup of batteries.
  - In line with different types of electrified vehicles, continuously evolving different types of batteries by taking advantage of their respective characteristics.
  - Commercialized the bipolar nickel-metal hydride battery as an onboard battery for driving for the first time in the world.
  - Used in the new Aqua announced in July 2021.
  - Output density: doubled compared to the batteries used in the previous generation of the Aqua.

The benefits of bipolar nickel-metal hydride batteries

- Improved accelerator responsiveness and an exciting sensation of speed when the accelerator pedal is pressed.
- Being more compact, less space is required to be equipped.
- More batteries can be installed in the same space (enabling drivers to enjoy driving on battery power alone for a longer time).
Expanding use of fuel cells from passenger cars to heavy-duty vehicles

- A fuel cell generates electricity through a reaction between hydrogen as a fuel and oxygen in the air. Similar to BEVs, FCEVs do not emit CO₂ on a TtW basis. But the amount of CO₂ emissions from fuel production (WtT) varies depending on the production method of hydrogen.
- The amount of CO₂ emissions from production of hydrogen varies depending on the production method. There are types of hydrogen with low environmental impact, including hydrogen produced from natural gas by capturing or storing CO₂ emitted in production processes (blue hydrogen) and hydrogen produced through electrolysis of water using renewable energy (green hydrogen).
- Use of hydrogen with few CO₂ emissions enables FCEVs to achieve substantial CO₂ reduction equivalent to that achieved by BEVs using renewable energy.
- Heavy-duty trucks are required to satisfy strict conditions, such as adequate cruising range and load capacity, as well as the ability to refuel quickly. They also account for around 70 percent of CO₂ emissions from commercial vehicles in Japan. Therefore, it is highly meaningful to make them zero-emission. Application of a fuel cell system based on the FCEV MIRAI for passenger cars to heavy-duty vehicles is being considered.

Hydrogen engine technology development

- Hydrogen-engine vehicles directly burn hydrogen as fuel in a modified conventional gasoline engine setup.
- Using 100-percent pure hydrogen, they emit nearly no CO₂ except for the combustion of minute amounts of engine oil during driving.
- Promoting agile development on the frontline of motorsports.
- The hydrogen-powered Corolla participated in the Fuji Super TEC 24 Hours Race held from May 21, 2021 for the first time.
- The GR86, which uses carbon neutral fuel, participated in the Super Taikyu Series 2022 as an attempt to increase options of fuels using internal combustion engines.
- Since the first race, more and more supporters have come together with the same goal to achieve carbon neutrality. Companies and municipalities that produce, transport, and use hydrogen and carbon-neutral fuel in the Series have increased from the initial eight (as of May 22, 2021) to 24 (as of June 3, 2022).

Plant-derived ethanol as automobile fuel

- Ethanol produced from sugarcane or corn, which has been increasingly used for the purpose of mainly reducing oil consumption in Brazil and the U.S., is attracting much attention as an option to achieve carbon neutrality.
- Plant-based bioethanol emits CO₂ when it is burned. But since plants absorb CO₂ to grow, it will not increase the overall amount of CO₂ in the air.
- For gasoline vehicles in general, gasoline mixed with a maximum of around 10% ethanol can be used. In countries where ethanol is inexpensive, such as Brazil, 100-percent pure ethanol fuel is sold, and in such areas, flexible-fuel vehicles (FFVs), for which high-concentration ethanol can be used, are being distributed.
- Toward achieving the carbon neutrality, Toyota provides vehicles that cater to different local conditions for customers.

Bioethanol produced from plants

- * Internal combustion engine vehicles

Establish "Research Association of Biomass Innovation for Next Generation Automobile Fuels"
Production

Aim

- Achieve carbon neutrality at all global plants by 2035.

Initiative

- Promote the energy reduction initiatives such as daily kaizen and the introduction of innovative technologies, as well as the introduction of renewable energy and utilization of hydrogen, at all plants of Toyota and consolidated subsidiaries.
- Daily kaizen and the introduction of innovative technologies:
  While the number of parts with much CO2 emissions during manufacturing is increasing due to the popularization of electrified vehicles, optimizing production equipment and improving energy reduction programs to reduce the amount of energy used per vehicle by an annual rate of 1 percent or more.
- Introduction of renewable energy and utilization of hydrogen:
  Working hand in hand widely with stakeholders both inside and outside the company to build the necessary social infrastructure to support the widespread use of these energy sources.

Plant Zero CO2 Emissions Challenge

Achieve zero CO2 emissions at global plants by 2050

<table>
<thead>
<tr>
<th>2025 Target</th>

</tr>
<tr>
<td>Hydrogen</td>
<td>- Promote proactive technological development to utilize hydrogen</td>
</tr>
</tbody>
</table>

- Introduced innovative technologies including a new type of paint atomizer (airless paint atomizer) that uses static electricity and promoted energy-saving through daily kaizen
- Reduced CO2 emissions by 21 percent compared to 2013 levels
- Achieved a 13 percent introduction rate for renewable electricity
- Maintained 100 percent renewable electricity introduction rate at all plants in Europe
- Installed solar panels at the affiliate in Thailand (3.8 MW)
- Continuously conduct various verification tests to support the utilization of hydrogen
- Stationary fuel cell (FC) generator diverting on-board FC, use of hydrogen burner for sealer drying furnaces in the battery assembly process, production of water electrolysis-based hydrogen by solar power generation, use of FC forklifts

* All plants of Toyota Motor Corporation and consolidated subsidiaries, and all Toyota vehicle production plants of unconsolidated subsidiaries (100% coverage)
Daily Kaizen and the Introduction of Innovative Technologies

Reducing CO₂ emissions in production activities

- Plant manufacturing divisions worked with production engineering divisions and facility administration divisions to conduct energy diagnoses at production sites, propose improvements and implement measures.
- Continued energy-saving activities (internal ESCO* activities) and sharing of best practices internally.
- Expanded the introduction of innovative technologies with a focus on painting processes and promoted energy-saving by adopting steamless and airless processes and shifting to LED lighting.

2021 results

- Global CO₂ emissions: Down 21 percent compared to 2013 levels
- Conducted study sessions with Toyota Group companies and suppliers to share know-how on energy-saving measures so that information can be reflected in kaizen implemented by those companies. Also observed other industries to continuously discover new ideas for kaizen.

* Energy reduction Support & Cooperation

Manufacturing-infrastructure collaboration in energy-saving activities

- Eliminating steam in painting process:
  Steam is associated with a large amount of loss of air and less than half of its energy can be used effectively. So, all-out efforts were made to replace the equipment to the one that do not use steam and to reconstruct power sources taking into account the overall optimization and reuse of exhaust heat.
- A series of activities, including the one described below, were recognized and awarded the Minister of Economy, Trade and Industry Prize of the 2021 Energy Conservation Grand Prize by the Energy Conservation Center, Japan.

Case: Oil-water separation system at ordinary temperature for antirust coating in production process (Takaoka Plant)

- To reduce energy consumption for heating water at 80°C, which is necessary for oil-water separation of cleansing water, introduced a centrifuge that separates oil and water using the difference in their specific gravity to realize oil-water separation without heating.

2021 Results

- CO₂ emissions reduction effect: 360 tons

Features of the applied system
Introduction of Renewable Energy and Utilization of Hydrogen

Expanding the introduction of renewable energy electricity

- Promoting the introduction of renewable energy, taking into consideration the characteristics of each region.
- Actively introducing renewable energy power generation facilities at Toyota plant sites.
- Tahara Plant: Installed wind power generators (22 MW, operation to begin in 2023)
- Affiliate in Thailand Siam Toyota Manufacturing Co., Ltd. (STM): Installed solar panels (10 MW)
- All plants in Europe: Maintained 100 percent renewable electricity introduction rate

2020 results

- Renewable electricity introduction rate (global): 13%

Expanding utilization of hydrogen with great promise as a means of suppressing supply and demand variation in energy and for energy storage and transport

- Collaboration with stakeholders
- Participating in initiatives to create mechanisms for the use of hydrogen energy throughout society, such as the Hydrogen Utilization Study Group in Chubu* (Japan), contributing to the realization of a decarbonized society.

* Established in 2020 by local municipalities and business groups with the aim of creating a large-scale demand for hydrogen and building a supply chain for stable hydrogen utilization in the Chubu region

Case Utilization of hydrogen at plants (Motomachi Plant)

- Conducting verification testing on FC forklifts and FC power generation (Honsha Plant).
- Replacing natural gas burners for the sealer drying furnace of battery cases with hydrogen burners.
- Conducting verification testing of co-firing of natural gas/pure hydrogen firing to contribute to wide-spread use of hydrogen.

Co-firing/pure hydrogen firing switchable burner for sealer drying furnaces

Solar panels introduced at STM

Wind power generator under construction at Tahara Plant
**Fundamental Approach**

**Aim**
- Building a sustainable global environment and society by increasing the reuse rate of precious, limited resources.

**Initiative**
- As an initiative to tackle resource-recycling issues under the Toyota Environmental Challenge 2050, formulated "Challenge of Establishing a Recycling-based Society and Systems", and started actions in 2015.

**Activities to Achieve Resource Recycling**

**Aim**
- Aiming to realize a recycling-based society by addressing such issues as the depletion of natural resources and increasing waste due to population growth and the accelerating pace of resource consumption, throughout the entire vehicle life cycle.

**Initiative**
- Placing particular importance on the two projects below in the Challenge of Establishing a Recycling-based Society and Systems.

- **Toyota Global 100 Dismantlers Project**: To establish social systems for appropriate treatment and recycling of end-of-life vehicles with reduced environmental impact.

- **Toyota Global Car-to-Car Recycle Project**: A resource recycling initiative throughout the entire vehicle life cycle.

---

**Challenge of Establishing a Recycling-based Society and Systems**

**Promote Global Deployment of End-of-life Vehicle Treatment and Resource Recycling Technologies and Systems Developed in Japan**

In the Challenge of Establishing a Recycling-based Society and Systems.

- **Toyota Global 100 Dismantlers Project**: To establish social systems for appropriate treatment and recycling of end-of-life vehicles with reduced environmental impact.

- **Toyota Global Car-to-Car Recycle Project**: A resource recycling initiative throughout the entire vehicle life cycle.
Toyota Global 100 Dismantlers Project

Establishment of Social Systems for Appropriate Treatment and Recycling of End-of-life Vehicles

- Inappropriate disposal and dismantlement of end-of-life vehicles may affect local environments and cause risks to the health and safety of local residents.
- Toyota promotes the establishment of social systems for appropriate treatment and recycling of end-of-life vehicles without environmental impact by using its long-established technologies and know-how.

Establishment of Model Facilities for Appropriate Treatment and Recycling of End-of-life Vehicles

- In India, due to the government’s announcement of the old-car replacement policy, the number of end-of-life vehicles is expected to increase, so that such issues as the collection and appropriate treatment of end-of-life vehicles are coming up.
- FY2022 results
  - Establishment of two model facilities for appropriate treatment and recycling of end-of-life vehicles in India
  - Maruti Suzuki Toyotsu India Private Limited (MSTI) financed by Toyota Tsusho Corporation commenced operations.
  - A facility for appropriate treatment and recycling of test cars and other end-of-life vehicles that were generated in Toyota Kirloskar Motor Private Limited (TKM), was established in TKM.
- For model facilities established by the end of FY2021, we, in cooperation with local affiliates, check the maintenance and operational status of appropriate treatment through such means as reports made in accordance with a checklist and visual inspection of the site by using web conferencing.

Toyota continues to use easy-to-recycle materials to promote resource recycling of end-of-life vehicles.

- Having directly visited and investigated dismantling companies around the world since the launch of the Raum passenger car in 2003, Toyota actively adopts vehicle structures that make it easy to dismantle and separate parts for new vehicles in order to ensure safe and speedy dismantling operations.

Achieving Industry-leading Levels in Easy-to-dismantle Design for Effective Resource Recycling

- Vehicle models launched in FY2022 for which an easy-to-dismantle design is adopted:
  - Aqua, Land Cruiser, Corolla Cross, Noah, Vios, LexusNX, Lexus UX300e, Lexus LX
- Toyota vehicles achieve a recyclability rate of 85 percent or more by calculation based on the vehicle design values.
- In light of recent circumstances, where many of the vehicles manufactured in Toyota Kirloskar Motor Private Limited (TKM), focused on the ease of removing the wiring harness, a representative example, in order to make Toyota's easy-to-dismantle design known to more dismantlers.
- Toyota won first prize in Newspaper Category No. 4 at the 2021 Japan Industrial Advertisement Award organized by Nikkan Kogyo Shimbun, Ltd.
- We adopt recycled plastics, in stages, into new models that will go on sale in 2022 and afterward, aiming to more than triple the use of recycled plastics by 2030.

Maximization of Utilization of Recycled Plastics in Toyota Vehicles

- In the lead up to 2050, Toyota aims to build a society that maximizes plastic recycling on a global scale.
- We collect and recycle bumpers replaced during repairs at dealers.
- To reuse automobile shredder residue (ASR) from end-of-life vehicles also as a material, which until now has been reused as heat, we are planning to use recycled plastic materials from ASR in new vehicles by utilizing crushing and sorting technologies of Toyota Metal Co., Ltd.
- We adopt recycled plastics, in stages, into new models that will go on sale in 2022 and afterward, aiming to more than triple the use of recycled plastics by 2030.
Rare Metals and Rare Earth Elements

- With a view to curbing the use of natural resources and increasing resource input efficiency, we promote the collection of rare resources used in electrified vehicles, such as hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs), and fuel cell electric vehicles (FCEVs), and the reuse of recycled materials, aiming to achieve the ultimate goal of closed-loop recycling.*1
- We are collaborating with partner companies to establish a system for collecting and recycling HEV batteries, HEV motor magnets, and FC stacks, along with tungsten carbide tools and other materials used in production.
- We are pressing ahead with car manufacturing that takes recycling into consideration, by feeding back results of these activities into the development and design stages.

*1 Recycling in which used products are manufactured into the same type of products

Battery 3R*2

- In Japan, Toyota has launched the provision of the new bZ4X BEV through the car subscription service “KINTO” or on a lease.
- Toyota collects all vehicle-use end-of-life bZ4X battery packs from dealers, dismantlers, etc. and reuse those usable for a second time as stationary batteries*3.
- Ultimately, these batteries are planned for use as materials for new batteries.

*2 In this context, “rebuild, reduce and recycle”
*3 Stationary storage batteries used to store renewable energy whose generation is unstable

Efforts toward Compliance with the New EU Battery Regulation

- At the end of 2020, the European Commission published the draft of a new EU battery regulation.
- This regulation embodies part of the circular economy envisaged in the European Green Deal.
- The scope of the regulation embraces all types of batteries and their entire life cycle, ranging from product design and production processes to reuse and recycling.
- While strengthening both internal and external partnerships, Toyota has started the following study in terms of major regulatory requirements:
  - Carbon footprint measurement and information gathering.
  - Study on building a system for measuring the carbon footprint of battery packs.
  - Consultation with battery manufacturers regarding how they can provide carbon footprint information.
  - Study on the use and required amount of recycled materials.
  - Due diligence required for specific materials (Li (lithium), Ni (nickel), Co (cobalt), and natural graphite).
  - Study on developing a battery supply chain management process.
  - Study on examining risks of human rights infringements and environmental destruction at the time of raw material mining.
  - Study on third-party certification.
  - Verification of compliance under a battery passport system using digital technology.
  - Study on building a battery traceability system.
Harmony with Nature

Updated in October 2022

Fundamental Approach

Aim

- Aim to create a society in harmony with nature by promoting biodiversity conservation activities through collaboration with many stakeholders.

Initiative

- As an initiative to tackle biodiversity and water issues under the Toyota Environmental Challenge 2050, formulated “Challenge of Establishing a Future Society in Harmony with Nature” and “Challenge of Minimizing and Optimizing Water Usage,” and started actions in 2015.

Biodiversity

Aim

- Promote biodiversity conservation activities based on the Toyota Policy on Harmony with Nature and the Policy for Sustainable Natural Rubber Procurement toward the building of a sustainable society in harmony with nature.

Initiative

Challenge of Establishing a Future Society in Harmony with Nature

Connect the Reach of Nature Conservation Activities Among Communities, with the World, to the Future

- Toyota Green Wave Project
  - Plant in Harmony with Nature ⇒ “Connecting Communities” activities
- Toyota Today for Tomorrow Project
- Global collaboration with NGOs ⇒ “Connecting with the World” activities
- Toyota ESD Project
  - Environmental education for the next generation ⇒ “Connecting to the Future” activities

* Education for Sustainable Development
Toyota Policy on Harmony with Nature

- This policy is a guideline for promoting harmony with nature and will serve as the basis for future activities.
- We will expand the reach of activities promoting harmony with nature, including the conservation of biodiversity, from communities to the world in collaboration with various people throughout society.

Humans enjoy prosperous and fulfilling lives by harmonizing various elements of nature such as water and air as well as conserving biodiversity. However, as environmental issues such as climate change and water shortages interact and become more severe, this harmony of natural elements is disrupted, and biodiversity is being lost. To improve the current situation, Toyota seeks to realize a sustainable society in harmony with nature by fully utilizing the technology and know-how it has developed through various businesses.

1. Recognizing that nature underlies our life and economy through resource supply and climate stabilization, we will promote activities that harmonize various elements of nature and conserve biodiversity.
2. We will expand the reach of activities among communities and connect them with the world by not only acting spontaneously, but also collaborating strongly with society.
3. We will promote environmental education to change the awareness of employees and generations based on the recognition that the biodiversity that forms the foundation of our prosperous life is facing a critical situation. At the same time, we will offer related information to society through both in-house and outside activities.

Policy for Sustainable Natural Rubber Procurement

- Toyota proceeds to eliminate deforestation and ecosystem conversion from our supply chains.
- Believing that protection of forests and other natural ecosystems is critical for maintaining biodiversity, combating climate change, and sustaining livelihoods, we have formulated the Policy for Sustainable Natural Rubber Procurement for natural rubber used in cars.
- This policy features the following:
  - Being aligned with the Policy Framework that was adopted in a September 2020 resolution by the General Assembly of the Global Platform for Sustainable Natural Rubber (GPSNR), of which Toyota is a member
  - Respecting the principles and guidelines laid out in the UN Guiding Principles for Business and Human Rights and the ILO fundamental conventions
— Toyota Green Wave Project —
Plant in Harmony with Nature ⇒ “Connecting Communities” activities

2025 Target
- Realize “Plant in Harmony with Nature” — 6 in Japan and 4 in other regions.
- Promote activities to connect with local communities in collaboration with affiliated companies.
- Start activities promoting harmony with nature in collaboration with local communities and companies toward biodiversity conservation.

2021 Results
- Realized 3 plants in Japan and 4 plants overseas.
- Promoted activities in collaboration with 23 Toyota Group companies and global affiliates. (Number of activities: 248)

Case: Development of the Plant in Harmony with Nature (1)
Toyota Motor Manufacturing (UK) Ltd. (U.K.)
- Located in a vast ecological park, Toyota Motor Manufacturing (UK) Ltd. realized the Plant in Harmony with Nature ahead of other global plants.
- More than 400 species of wildlife and plants are conserved in five zones in cooperation with local experts based on conservation plans and methods established by the government.

2021 Results
- Observed butterflies and bees that are important indicator species in the grassland area.
- Butterflies: Over 1,000  Bees: Over 200
- Provided observation results to national research institutes.

— Toyota Today for Tomorrow Project —
Global collaboration with NGOs ⇒ “Connecting with the World” activities

2025 Target
- Globally strengthen conservation of endangered species, which symbolize biodiversity, in collaboration with NGOs and others.

2021 Results
- Supported 27 projects of NPOs and other non-profit organizations and groups addressing biodiversity and climate change (17 in Japan and 10 in other regions).

Initiatives through GPSNR²
- July 2019: Participated in the GPSNR.
- September 2021: Announced the Policy for Sustainable Natural Rubber Procurement.
- 2022: In response to the questions requested by the GPSNR regarding the status of implementation of this policy, information is being collected in cooperation with suppliers with the aim of replying by the end of December.

² Global Platform of Sustainable Natural Rubber: An international framework for improving the environmental, social and economic aspects of natural rubber procurement

Policy for Sustainable Natural Rubber Procurement

---

Overview of the Plant in Harmony with Nature

- Quantitative assessment of ecosystems by surveying indicator species
- Continuous monitoring
- Apex species: (birds, etc.) Small animals: (butterflies, frogs, etc.)
- Wildlife habitat maintenance and improvement

Advancement of the trinity of activities

- Local experts
  - Select indicator species
  - Assess ecosystem status
- Employees
  - Develop biodiversity education
  - Promote local interaction
- Local residents
  - Develop biodiversity education
  - Promote local interaction

Asian Golden Weaver

*1 International Union for Conservation of Nature and Natural Resources
Environmental education for the next generation ⇒ “Connecting to the Future” activities

2025 Target
- Implement globally unified initiatives to foster environmentally conscious persons responsible for the future.
- Offer environmental education opportunities by utilizing biotopes and others in collaboration with the Plant in Harmony with Nature.
- Foster environmentally conscious persons at both in-house and outside sites, including plants and the Forest of Toyota, by utilizing educational tools in harmony with nature for the next generation.

2021 Results
- Conducted environmental education programs around the world.
- Examples of Toyota Motor Corporation (Japan).
  - Implemented environmental study sessions.
  - Plant in Harmony with Nature (21 sessions, including online sessions)
  - The Forest of Toyota (179 sessions).
- Distributed 17,852 educational tools in harmony with nature for the next generation.

Global Implementation of Environmental Education for the Next Generation
- Building good relationships with local communities through environmental education has a positive impact on Toyota’s business over the medium to long term.
- We implement the Toyota ESD Project in each region and hold many environmental study sessions and events in which local residents and employees learn and work together.

Case: Establishment of Ecozone (2018) and Implementation of Many Environmental Learning and Conservation Activities

Toyota Kirloskar Motor Private Ltd. (India)
- Ecozone
  - A place for environmental learning for employees, business partners (suppliers, dealers, logistics companies), children/students, and local residents.
  - A place with about 25 acres, comprising of 17 theme parks representing the five modules of biodiversity, climate change, energy, water, and waste.
  - Results since opening
    - Confirmed over 650 plant species and 198 faunal species (Species listed by the IUCN Red List: 38 plant species, 3 faunal species).
    - More than 20,000 children/students participated in exercises.
Water Environment

Aim
- Minimize the impact on water environments globally under different environments in each region.
- Strive to become the No. 1 regional plant leading to prosperity throughout the entire society through effective use of water resources.

Initiative

Toyota Water Environment Policy
- Strive to become the No. 1 regional plant leading to prosperity throughout the entire society.
- Assess our impact on water environments and work to minimize those impacts from two perspectives: the input side, where we thoroughly reduce the amount of water usage, and the output side, where we purify wastewater thoroughly and return.

Challenges of Minimizing and Optimizing Water Usage

Minimize Water Usage and Implement Water Discharge Management According to Individual Local Conditions

<table>

Water quality
- Thoroughly manage water discharge quality under internal standards that are stricter than regulatory standards
- Continuously assess the impact of wastewater at all plants where it is discharged directly into the river
- Thoroughly manage water discharge quality under internal standards that are stricter than regulatory standards
- Continuously assess the impact of wastewater at all plants where it is discharged directly into the river
- Continuously manage water quality under internal standards that are stricter than regulatory standards
- Assessed the impact of wastewater at all plants

Water Usage per Vehicle Produced Globally

- Minimize the impact on local water resources by minimizing water withdrawal and utilizing rainwater
- Have a net positive impact on the environment by returning clean water in the local water environment

* All plants of Toyota Motor Corporation and consolidated subsidiaries, and all Toyota vehicle production plants of unconsolidated subsidiaries (100% coverage)
Cases of Water Usage Reduction

Case 1: Water Usage Reduced Through Repeated Kaizen Activities

**Toyota do Brasil Ltda. (Brazil)**
- Reduce water usage in the painting process, which uses approximately 80 percent of the water in the plant.
  ⇒ Minimize water usage while maintaining good product conditions by improving cleaning nozzles in the water cleaning process.
  ⇒ Reuse wastewater from air supply houses and deionizers.

**2021 Results**
- Water usage reduction: 25,000 tons in total.
- Per-unit water usage (per vehicle produced): Reduced by 42 percent compared to 2013 levels.
- Received “Local Environmental Award” organized by the Association of Automotive Engineering in recognition of the above activities.

![Cleaning process in painting](image1)
![Water usage reduction kaizen team members](image2)

![Wastewater Collection Flow from Die Casting Machine](Diagram)

**Case 2: Water Usage Reduced Through Expansion of Water Recycling in the Casting Process**

**Toyota Motor (Changshu) Auto Parts Co., Ltd. (China)**
- Promote activities to become a zero-emission casting plant.
  ⇒ During the treatment of wastewater from die casting machine, 54 tons of wastewater is generated annually for cleaning the oil accumulated in a concentration system.
  ⇒ Reuse cleaning wastewater by adding an oil separator, piping and switching valves.

**2021 Results**
- Reuse of water: 51 tons (94 percent recovery rate).
Governance

a) Board's Oversight of Climate-related Risks and Opportunities

- At Toyota, to ensure effective strategy formulation and implementation in line with latest societal trends, important climate-related issues, if arise, are reported to the Board of Directors.
- The Board of Directors conducts the following duties:
  - Deliberate and supervise strategies, major action plans, and business plans.
  - Monitor the progress toward qualitative and quantitative targets addressing climate issues.
- Monitoring is performed in consideration of the financial impact of the following risks/opportunities, which may turn into climate-related issues:
  - Risks/opportunities related to products, such as fuel efficiency/emission regulations.
  - Risks/opportunities related to low-carbon technology development.
- These governance mechanisms are used in formulating long-term strategy, including the Toyota Environmental Challenge 2050, and in formulating and reviewing the medium- to long-term targets and action plans.
- Case of decisions made at the Board of Directors Meeting in 2021
  - Investing in Toyota Green Energy, which was established jointly by Toyota, Chubu Electric Power Co., Inc. and Toyota Tsusho Corporation. Toyota Green Energy is a new company that will obtain and manage renewable energy sources in Japan. It is expected to supply electric power to the Toyota Group in the future.

b) Management’s Role in Assessing and Managing Climate-related Risks and Opportunities

- The Board of Directors Meeting is the ultimate decision-making and oversight body of Toyota in addressing climate-related issues.
- The committees below are the major bodies in assessing and managing the climate-related risks and opportunities.

<table>
<thead>
<tr>
<th>Frequency of reporting on climate-related issues to the Board of Directors</th>
<th>Sustainability Meeting</th>
<th>Environmental Product Design Assessment Committee</th>
<th>Production Environment Committee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Every six months</td>
<td>When an important event arises</td>
<td>When an important event arises</td>
<td></td>
</tr>
</tbody>
</table>

Roles

- Deliberates and reports on formulation of measures to solve climate-related and other sustainability issues
- Chaired by the Chief Sustainability Officer (CSO)
- Manages assessment of product-related risks and opportunities, formulation/implementation of strategy and planning, monitoring, etc.
- Manages assessment of plants/production-related risks and opportunities, decisions on countermeasures, monitoring, etc.
**Strategy**

**a) Short-, Medium- and Long-term Climate-related Risks and Opportunities the Organization Has Identified**

- Toyota strives to identify the various risks and opportunities that will arise from environmental issues, takes action while continuously confirming the validity of strategies such as the Toyota Environmental Challenge 2050 and works to enhance its competitiveness.

- Changes associated with climate change that may have various impacts on Toyota’s business fields.

- Measures need to be taken in various areas, including response to tighter regulations by the government and the adoption of new technology.

- Increasing severity of natural disasters such as storms and flooding, due to higher temperatures and rising sea levels.

- The acceleration of climate change may pose risks to Toyota’s business, but if we can respond appropriately, this will lead to enhanced competitiveness and the acquisition of new business opportunities.

- In accordance with the above understanding, we have organized the risks relating to climate change and identified particularly significant risks in line with risk management processes based on the degree of impact and stakeholders’ interests.

- To respond to risks, we are implementing the following measures:
  - Promote electrification and the introduction of renewable energy in production processes.
  - Take adaption measures for natural disasters.
  - Support and sign the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).
  - Disclose information appropriately concerning risks and opportunities related to climate change and their analyses.
  - Conduct disclosure through responses to CDP*1 in accordance with the TCFD.

For details of risks, please see p. 42

---

For details of scenario analysis, please see p. 40
b) Impact of Climate-related Risks and Opportunities on the Organization’s Businesses, Strategy, and Financial Planning

- Under the recognition that climate-related issues may have a substantive impact on its businesses, strategy, and financial planning, Toyota reviews its strategy based on the risks and opportunities associated with climate-related issues whenever necessary.
- The table on the right describes the specific impact on our businesses, strategy, and financial planning.
- Toyota identifies risks, determines their degree of significance, and sets priorities, in accordance with the Toyota Global Risk Management Standard (TGRS).
- Details of the TGRS are provided in the next chapter “Risk Management.”

### Impact on Strategy

- Collaboration with suppliers  
- Risks and opportunities related to recycling |

* R&D: Research & Development
c) Resilience of the Organization’s Strategy, Taking into Consideration Different Climate-related Scenarios, including a 2°C or Lower Scenario

STEP 1
Set Future Storylines Assuming Climate Change Effects
- Substantial changes brought by climate change and associated policies of various countries to the automobile industry and the entire mobility society will present both risks and opportunities to Toyota.
- Based on risk and opportunity analysis, using scenarios such as those of the Intergovernmental Panel on Climate Change (IPCC)’s Representative Concentration Pathways (RCP) 4.5 equivalent, International Energy Agency’s Stated Policies Scenario (STEPS), Sustainable Development Scenario (SDS), and Net Zero Emissions by 2050 Scenario (NZE) as reference,
- We envisioned three future storylines of society: the stated policies future storyline, 2°C future storyline, and 1.5°C or less future storyline in around 2030 for external environment.

STEP 2
Consider the Impacts on Toyota
- In a society of the 2°C future storyline and the 1.5°C or less future storyline, the role of electrified vehicles (ZEVs in particular) will increase.
- In case of a society of the 1.5°C or less future storyline in particular, the percentage of ZEVs among new vehicle sales will increase greatly and the use of carbon neutral fuels[^3] will also expand.
- With regard to effects on production and purchasing, since the introduction of carbon taxes and increased tax rates may lead to higher costs, expanding the use of energy-saving technology, renewable energy and hydrogen will mitigate the risks.
- In the case of a society of the stated policies future storyline, if adequate climate change measures are not implemented throughout society, the following events are likely to increase:
  - Production suspensions due to increased frequency and severity of natural disasters such as flooding.
  - Decreased production and production suspensions due to supply chain disruptions.

STEP 3
Toyota’s Strategies
- Fundamental approach
  - In April 2021, Toyota proclaimed that it would address global-scale challenges to achieve carbon neutrality by 2050.
  - As an initiative to this end, we promote environmental technology development for electrified vehicles, such as hybrid electric vehicles (HEVs), plug-in hybrid vehicles (PHEVs), battery EVs (BEVs) and fuel cell vehicles (FCEVs).
- Electrified vehicle strategy
  - Toyota conducts sales in over 170 countries and regions.
  - It is important to offer options of a variety of electrified vehicles to satisfy the different needs of the countries and regions with diverse economic conditions, energy and industrial policies, and customer needs.
  - Toyota has sold a cumulative total of over 20 million electrified vehicles worldwide. As one of the first companies to respond to climate change risks, it has achieved a CO2 emissions reduction of over 160 million tons (as of February 28, 2022).
- Future actions
  - With regards to BEVs, successively introduce models with dedicated platforms starting in 2022 and promote practical vehicle supply through battery development and production strategies.
  - Declared efforts to achieve the aim, as announced in December 2021, of developing 30 types of BEVs and achieving a full lineup in the passenger and commercial segments globally by 2030 to reach 3.5 million annual global vehicle sales.
  - Advance the sales of electrified vehicles to fit different regional conditions and customer preferences.
  - In addition to BEVs, promote electrified vehicle strategy from all directions, and flexibly and strategically change total vehicle sales and other conditions in response to changes in the market while leveraging the strengths that we have gained through our experience so far, thereby encouraging customers in each region to choose us and accelerating the increased use of electrified vehicles.

[^1]: Set using scenarios such as the Inter governmental Panel on Climate Change (IPCC)’s Representative Concentration Pathways (RCP) 4.5 equivalent, IEA’s Stated Policies Scenario (STEPS), Sustainable Development Scenario (SDS), and Net Zero Emissions by 2050 Scenario (NZE) as reference.
[^2]: International Energy Agency
[^3]: Carbon neutral fuels: Next-generation biofuels and synthetic fuels
• Achieving carbon neutrality in the 2°C future storyline and the 1.5°C or less future storyline
  • Even if battery demand increases in accordance with altered customer needs, flexibly respond by enhancing collaboration with existing/new partners, and swiftly establishing production structures at suppliers that have capital ties with Toyota.

• Challenges toward new technologies
  • In addition to increasing the number of electrified vehicles, promote the introduction of CO2-reducing off-cycle technology* (although not reflected in mode fuel efficiency).
  • Expand options for technologies that will contribute to reducing CO2 emissions of vehicles (including vehicles currently in use), such as hydrogen fuel/hydrogen engine vehicles, and carbon neutral fuel technologies.

Cases of efforts toward new technology development
  • Participate in motorsport events, such as the Super Taikyu Series in Japan, to accelerate the development of hydrogen fuels and hydrogen engines and promote verification tests of carbon neutral fuels.
  • Implement initiatives to expand options to make, transport, and use hydrogen in collaboration with various companies and local governments, such as the supply of hydrogen produced from sewage biogas by Fukuoka City for hydrogen engines, with the aim of establishing partnerships toward realizing a hydrogen-based society.

• Achieving carbon neutrality
  • In order for the automobile industry to achieve carbon neutrality, it is vital to operate energy policies (renewable energy, charging infrastructure, etc.) and industrial policies (purchasing grants, supplier support, battery recycling systems, etc.) in a unified manner.
  • It is necessary to implement initiatives in coordination with various stakeholders, such as national governments and industry organizations.
  • When undertaking its business activities globally, Toyota will coordinate with national governments to establish infrastructure for promoting electrification while implementing electrified vehicle strategies that contribute to reducing CO2 emissions throughout the entire life cycle.

Initiatives in the production field
  • We announced our aim to achieve carbon neutrality at global plants by 2035, and we also prepare to face risks such as carbon taxes.
  • We are promoting the reduction of CO2 emissions through comprehensive energy-saving technology and the introduction of renewable energy and hydrogen at plants; Achieved 100 percent introduction rate for renewable electricity at all plants in Europe.

• Strengthening strategic resilience
  • Implement measures to respond to natural disasters such as formulating a business continuity plan (BCP).
  • Strengthen the supply chain by enhancing information gathering, and improve communication.
  • Toyota will work together not only with the automobile industry but with all industries while continuing to engage in challenges to respond to a society of the 1.5°C or less future storyline through initiatives that are practical as well as sustainable.
  • To ensure stable fund procurement and lasting corporate value enhancement, we check the progress and validity of Toyota’s strategies by:
    • Conducting appropriate information disclosures regarding various ESG assessment indicators.
    • Enhancing dialogue with stakeholders including institutional investors.

* Off-cycle technology: Technologies such as high efficiency lightings, waste heat recovery, active aerodynamic improvement and solar radiation/temperature management that improve actual fuel consumption. The U.S. has a system of offering credits equivalent to the amount of improvement achieved.
Risk Management

a) Organization’s Processes for Identifying and Assessing Climate-related Risks

- Toyota has a company-wide risk management system called the TGRS that covers all risks related to its corporate activities and behavior, including climate change.
- All risks, including climate change, are identified and assessed based on the TGRS.
- Risk assessment is carried out based on the two perspectives of "magnitude of impact" and "vulnerabilities" to clarify the substantive financial or strategic impact on the business.
- The level of seriousness of risks is conclusively assessed on a four-point scale by comprehensively examining the following assessments.
  - Magnitude of impact
    - Assessed comprehensively by the four elements of "finance", "reputation", "violation of laws and regulations", and "business continuation".
    - "Finance" is assessed on a five-point scale using the ratio to sales as an indicator.
    - "Reputation", "violation of laws and regulations", and "business continuation" are also assessed on a five-point scale.
  - Vulnerabilities
    - Assessed by the two elements of "countermeasures" and "clarity of responsible organizations."

<table>

</tr>
</tbody>
</table>

b) Organization’s Processes for Managing Climate-related Risks

- After risks by region, function (manufacturing, sales, etc.), and product are extracted by each division and assessed in view of magnitude of impact and vulnerability according to the TGRS, each region and each Group mutually cooperates and supports to implement a prompt response.
- Chief Officers of each Group or Company Presidents of in-house companies supervise the activities of the companies, and at the subordinate level, the General Managers supervise the activities of divisions and implement and monitor countermeasures.
- Climate-related risks and opportunities are also identified and assessed by the Environmental Product Design Assessment Committee and Production Environment Committee. The following matters are discussed, and the response status is monitored and reviewed by the divisions in charge and relevant officers at the respective committees.
  - Environmental Product Design Assessment Committee: Fuel economy regulations and procurement
  - Production Environment Committee: Direct operations, such as CO2 emission regulations on plants and water risks
- Meetings of these two committees are held when an important event arises with the participation of Executive- or General Manager-level members of relevant divisions, such as technology, environment, finance, purchasing, and sales.
- Through examinations by these committees, the risks are assessed multiple times a year.
- Important risks and opportunities that require prompt response are reported to the Board of Directors Meeting one by one, and the response measures are determined.

c) How Processes for Identifying, Assessing, and Managing Climate-related Risks are Integrated into the Organization’s Overall Risk Management

- As described above, the processes using the TGRS are a company-wide risk management system that covers all risks and opportunities related to corporate activities and behavior, including climate change.
- At the meetings of the Environmental Product Design Assessment Committee and Production Environment Committee, where members from relevant divisions gather, climate-related risks and opportunities are identified, assessed, and countermeasures are examined.
Metrics and Targets

a) Metrics Used by the Organization to Assess Climate-related Risks and Opportunities in Line with Its Strategy and Risk Management Process

- Toyota believes that setting multiple metrics to comprehensively manage climate-related risks and opportunities is important as a measure for adaptation to and mitigation of climate change.
- The metrics include not only the amount of CO₂ emissions but also other elements deeply related to climate change, such as energy, water, resource recycling, and biodiversity.
- These metrics are systematically incorporated in the following targets as the six challenges:
  - Toyota Environmental Challenge 2050: A long-term target toward 2050
  - 2030 Milestone: A medium-term target toward 2030
  - Seventh Toyota Environmental Action Plan: A short-term target toward 2025
- Toyota aims to achieve carbon neutrality by 2050 by following the three zero challenges:
  - Life Cycle Zero CO₂ Emissions Challenge: Scope 1, 2, and 3 along with voluntary initiatives
  - New Vehicle Zero CO₂ Emissions Challenge: Focuses on TtW* of Category 11 in Scope 3
  - Plant Zero CO₂ Emissions Challenge: Scope 1, 2 and production bases of some financially non-consolidated affiliates (Scope 3)
- Toyota announced in 2021 that it would aim to achieve carbon neutrality at plants by 2035.
- Internally, certain carbon prices are used as indicators to examine capital investment and other activities.
- Approaches to each target are presented in the table on the next page.

b) Scope 1, Scope 2, and, if Appropriate, Scope 3 greenhouse gas (GHG) Emissions, and the Related Risks

- Calls for disclosure related to climate change issues based on the GHG protocol, etc. have been increasing globally.
- Although Toyota has been working to reduce CO₂ emissions broadly, it reviewed and expanded the organizational boundary for CO₂ emissions reduction.
- The table below shows trends in CO₂ emissions in the new organizational boundary from 2019 to 2021.

<table>
<thead>
<tr>
<th>Trends in CO₂ Emissions</th>
<th>Third Party Verification</th>
<th>2021 data</th>

</tr>
</tbody>
</table>

* Changes in calculation of CO₂ emissions.
  - Organizational boundary is as follows (both include some estimated values):
  - Conventional: Financially consolidated and financially non-consolidated production bases
  - New: Financially consolidated production bases and non-production bases.

- Toyota Environmental Action Plan (2025 Target)
  - Toyota formulated the Toyota Environmental Challenge 2050 in 2015 and the 2030 Milestone in 2018 so that each one of us can better understand these issues and continue to tackle challenges from a long-term perspective of the world 20 and 30 years ahead.

- In 2020, we set the 2025 Target as the most recent target of the Toyota Environmental Challenge 2050 in 2015 and the 2030 Milestone in 2018 so that each one of us can better understand these issues and continue to tackle challenges from a long-term perspective of the world 20 and 30 years ahead. We formulated the Toyota Environmental Challenge 2050 in 2015 and the 2030 Milestone in 2018 so that each one of us can better understand these issues and continue to tackle challenges from a long-term perspective of the world 20 and 30 years ahead. In 2020, we set the 2025 Target as the most recent target of the Toyota Environmental Challenge 2050 in 2015 and the 2030 Milestone in 2018 so that each one of us can better understand these issues and continue to tackle challenges from a long-term perspective of the world 20 and 30 years ahead.

- We are pursuing the development of a sustainable society by implementing, in collaboration with global consolidated subsidiaries and business partners around the world, the specific activities determined through a process of back casting from Toyota’s medium- and long-term vision.
By promoting activities for the milestones of New Vehicle Zero CO₂ Emissions Challenge and Plant Zero CO₂ Emissions Challenge, and with support from stakeholders such as suppliers, energy providers, infrastructure developers, governments, and customers.

Countries and regions: Japan, U.S., Europe, China, Canada, Brazil, Saudi Arabia, India, Australia, Taiwan, Thailand, and Indonesia.

The figures are estimation and may be changed by market conditions.

Long-term Targets and Medium-term Targets

**Long-term**
- **Life Cycle Zero CO₂ Emissions Challenge**
- **New Vehicle Zero CO₂ Emissions Challenge**
- **Plant Zero CO₂ Emissions Challenge**
- **Challenge of Minimizing and Optimizing Water Usage**
- **Challenge of Establishing a Recycling-based Society and Systems**
- **Challenge of Establishing a Future Society in Harmony with Nature**

**Contribution to SDGs**
- Carbon neutrality by 2050

**Toyoda Environmental Challenge 2050**
- Completely eliminate all CO₂ emissions throughout the entire vehicle life cycle.
- Reduce global average CO₂ emissions (TtW) from new vehicles by 90 percent compared to Toyota’s 2010 levels by 2050.
- Achieve zero CO₂ emissions at global plants by 2050.
- Minimize water usage and implement water discharge management according to individual local conditions.
- Promote global deployment of End-of-life vehicle treatment and recycling technologies and systems developed in Japan.
- Connect the reach of nature conservation activities among communities, with the world, to the future.

**2030 Milestone**
- Carbon neutrality at plants by 2035

**Medium-term**
- Reduce CO₂ emissions by 25 percent or more¹ throughout the entire vehicle life cycle compared to 2013 levels.
- Reduce global² average CO₂ emissions (TtW, g/km) from new vehicles by 35 percent or more² compared to 2010 levels.
- Reduce CO₂ emissions from global plants by 35 percent compared to 2013 levels.
- Implement measures, on a priority basis, in the regions where the water environment is considered to have a large impact.
- Water quality: Complete impact assessments and measures at all of the 22 plants where used water is discharged directly to river in North America, Asia, and Europe.
- Complete establishment of battery collection to recycling systems globally.
- Complete setup of 30 model facilities for appropriate treatment and recycling of end-of-life vehicles.
- Realize “Plant in Harmony with Nature”—12 in Japan and 7 in other regions—as well as implement activities promoting harmony with nature in all regions in collaboration with local communities and companies.
- Disclose information appropriately and communicate with local communities and suppliers.
- Expand initiatives both in-house and outside to foster environmentally conscious persons responsible for the future.

**Short-term**

7th Toyota Environmental Action Plan (2025 Target)

---

¹ By promoting activities for the milestones of New Vehicle Zero CO₂ Emissions Challenge and Plant Zero CO₂ Emissions Challenge, and with support from stakeholders such as suppliers, energy providers, infrastructure developers, governments and customers.

² Countries and regions: Japan, U.S., Europe, China, Canada, Brazil, Saudi Arabia, India, Australia, Taiwan, Thailand, and Indonesia.

³ The figures are estimation and may be changed by market conditions.

</tbody>
</table>

### Challenge of Minimizing and Optimizing Water Usage

- **CO₂ emissions from plants**: Reduce CO₂ emissions by implementing innovative technologies and stably kaizen and introducing renewable energy.
- **CO₂ emissions from global plants by 30 percent compared to 2013 levels**: Achieve a 25 percent introduction rate for renewable electricity.
- **Promote proactive technological development to utilize hydrogen**:

### Water quantity

- **Reduce water usage taking the water environment in each country and region into consideration**.
- **Promote wastewater recycling, rainwater use, and various activities including daily kaizen**.
- **Reduce global average water usage by 3 percent per vehicle produced compared to 2013 levels (reduce by 34 percent compared to 2001 levels)**.
- **Complete measures at 2 Challenge-focused plants where the water environment is considered to have a large impact**.

### Water quality

- **Thoroughly manage water discharge quality under internal standards that are stricter than regulatory standards**.
- **Continuously assess the impact of wastewater at all plants where it is discharged directly into the river**.

### Toyota Global 100 Dismantlers Project

- Complete setup of 15 model facilities for appropriate treatment and recycling of end-of-life vehicles.
- Continuously accelerate easy-to-dismantle designs.
- Integrate easy-to-dismantle designs to respond to appropriate treatment and recycling of End-of-life vehicles and resource issues, and provide appropriate information (large batteries, fuel cell (FC), hydrogen tank).

### Toyota Global Car-to-Car Recycle Project

- Establish a safe and efficient system for battery 3R (Rebuild, Reuse, and Recycle), eying the widespread use of electrified vehicles.
- Aim to maximize collection and detoxification of End-of-life batteries globally.
- Start operating battery 3R throughout 5 regions—Japan, U.S., Europe, China, and Asia.
- Develop technologies to utilize recycled materials (especially plastics) in accordance with the conditions in each region.
- Promote utilization by technological development to optimally exploit recycled materials in Europe and to increase the supply of recycled materials in Japan.

### Toyota Green Wave Project

- Fulfill "Plant in Harmony with Nature"—6 in Japan and 4 in other regions.
- Promote activities to connect with local communities in collaboration with affiliated companies.
- Start activities promoting harmony with nature in collaboration with local communities and companies toward biodiversity conservation.

### Toyota Today for Tomorrow Project

- Fulfill "Plant in Harmony with Nature"—6 in Japan and 4 in other regions.
- Promote activities to connect with local communities in collaboration with affiliated companies.
- Start activities promoting harmony with nature in collaboration with local communities and companies toward biodiversity conservation.

### Toyota ESD* Project

- Implement globally unified initiatives to foster environmentally conscious persons responsible for the future.
- Offer environmental education opportunities by utilizing biotopes and others in collaboration with the Plant in Harmony with Nature.
- Foster environmentally conscious persons at both in-house and outside sites, including plants and the Forest of Toyota, by utilizing educational tools in harmony with nature for the next generation.
- *Education for Sustainable Development
Greenhouse Gases (GHG)

A. CO₂ Emissions & CO₂ Emissions Intensity

Scope 1 (Direct Emissions) & Scope 2 (Energy-related Indirect Emissions): Global

Total:

|                     | 364.34 | 324.97 | 373.36 |

Calculated in accordance with the GHG Protocol.

Organizational Boundary:

- Mainly covers automotive business of Toyota Motor Corporation and consolidated subsidiaries

¹ The figures for 2019 and 2020 were also recalculated due to the revision of calculation conditions.

² Calculated in Scope 1 & 2 and Scope 3 Category 11

³ In Category 11, the data of Toyota Motor Corporation and Daihatsu Motor Co., Ltd. are provided. For all the consolidated subsidiaries, data will be disclosed as soon as they are ready.

¹¹ For Toyota Motor Corporation, Category 11 is calculated from the average fuel efficiency of vehicles (excluding the freight category in the regulations for fuel efficiency, as well as trucks and buses used in each country and region—Japan, U.S., Europe, China, Canada, Brazil, Saudi Arabia, India, Australia, Taiwan, Thailand and Indonesia).

</tbody>
</table>
| 16  | Air quality | Steadily introduce low-emission vehicles and boost further improvement by introducing and increasing ZEV*  
* Zero Emission Vehicles: Vehicles that have the potential not to emit any CO2 and NOx (nitrogen oxide) during driving such as battery electric vehicles (BEVs) and fuel cell electric vehicles (FCEVs) | • In response to stricter emissions regulations in various countries and regions, steadily introduced vehicles that satisfy those regulations | – – |
| 17  | Waste | Promote activities to thoroughly reduce waste globally and aim to minimize the volume of resource input and waste, with the environment and economy in balance | Promoted activities to reduce waste through development and deployment of waste reduction-oriented production technologies and daily kaizen activities | – – |
| 18  | Logistics packaging | ● Implement initiatives to reduce and recycle plastics used in packaging and recycle them | Continued to promote the reduction of plastics used in packaging by reviewing packaging specifications and active use of recycled materials | – – |
| 19  | Risk Management | Thoroughly comply with environmental laws and regulations and strengthen proactive prevention activities for environmental risks in each country and region | There were 2 environmental non-compliance issues in the production area (1 in Japan and 1 in the other region) and 1 complaint in the non-production area (1 in Japan), for which measures were completed. There were no significant violations of environmental laws and regulations and environmental non-compliance issues | – – |
Third-party Verification

Verification Opinion

Mr. Akio Toyota
President
Member of the Board of Directors
Toyota Motor Corporation
1 Toyota-cho, Toyota-city, Aichi Prefecture
Japan

Objective
SGS Japan Inc. (hereinafter referred to as “SGS”) was commissioned by Toyota Motor Corporation (hereinafter referred to as “the Organization”) to conduct a third-party verification based on Criteria of Verification (RS-14.14.3-2019) and the SGS verification protocols regarding the data prepared by the Organization on the scope of verification (hereinafter referred to as “the statement”). The objective of this verification is to confirm that the statement in the Organization’s applicable scope has been correctly calculated and reported in the statement in conformance with the criteria, and to express our views as a third-party. The Organization is responsible for the preparation and for presentation of the statement.

Scope
The scope of verification is Scope 1 and Scope 2, energy consumption, Scope 3 emissions, water usage, waste volume and automobile-related environmental performance (disclosed in the Toyota Sustainability Data Book).

The period covered in the report is FY 2022. Refer to the attached sheet for details.

Procedure of Verification
The statement was verified in accordance with criteria of verification, and the following processes were implemented at a limited level of assurance:

• Verification of the calculation system: Interviews on the measurement, tabulation, calculation and reporting methods employed by the Organization as well as review of related documents and records.

• Verification of the statement. On-site verification and review of source documents at the Toyota Plant, and on-site verification and review of data held remotely by the Toyota Plant, via the Internet as special measures due to COVID-19 outbreak. Analytical procedures and interviews for other sites in the scope of verification carried out at the head office of the Toyota Plant.

The criteria for this review are based on the Ecoinvent Factories 2021, the Greenhouse Gas Emissions Accounting and Reporting Manual ver 4.7, the World Resources Institute for Accounting of Greenhouse Gas Emissions Through Supply Chain Ver 2.5, the Green Value Factr Database on the same Accounting Ver. 5.1, the Basin Database of the Carbon Dioxide Removal Communication Program Ver 1.01, the BEA Ver. 2.3, the Toyota LCA System and the protocol specified by the Organization.

Conclusion
Within the scope of the verification activity employing the methodologies mentioned above, nothing has come to our attention that caused us to believe that the Organization’s statement was not calculated and reported in conformance with the criteria. SGS Japan Inc. affirms its independence from the Organization, being free from bias and conflicts of interest with the Organization.

Yoji Takeuchi
Partner
SGS Japan Inc.

The details of the scope of verification

1. Average CO2 Emissions from New Vehicles Global (Compared to 2010 levels)
   Toyota and Lexus brand passenger cars in 14 countries and regions excluding trucks and commercial vehicles subject to fuel efficiency regulations: Japan, United States, Europe, China, Canada, Brazil, South Africa, India, Australia, Thailand, Indonesia, Botswana, South Africa
   Average of 64.6 g/km

2. Reduction rate of average CO2 Emissions from New Vehicles Global (Compared to 2010 levels)
   Toyota and Lexus brand passenger cars in 14 countries and regions excluding trucks and commercial vehicles subject to fuel efficiency regulations: Japan, United States, Europe, China, Canada, Brazil, South Africa, India, Australia, Thailand, Indonesia
   Average of 64.6 g/km

3. Sales of Electrified Vehicles Global
   Toyota and Lexus brand electrified vehicles (passenger cars and commercial vehicles) globally
   7.19 million units

4. CO2 Emissions Reduction Effects from Electrified Vehicles Global
   Complete CO2 reduction effect from Toyota and Lexus brand electrified vehicles (passenger cars and commercial vehicles) in the past thirty years
   182 million tCO2e

5. CO2 Emissions Sources, Global
   Category 1: Sales of electrified vehicles related to the automobile business of Toyota, Lexus and its consolidated subsidiaries
   Category 2: Toyota Motor Corporation and its consolidated subsidiaries
   Category 3: Toyota Motor Corporation and its consolidated subsidiaries
   Category 4: Toyota Motor Corporation and its consolidated subsidiaries
   Category 5: Toyota Motor Corporation and its consolidated subsidiaries

Fundamental Approach

Aim

- Toyota aims to be the best company in town that is both loved and trusted by the people.
- Respect and honor the Human Rights of our employees, customers and all individuals that are impacted by our business.
- Each employee contributes to the creation of a work environment that promotes safety & health, respects each employee's dignity, is inclusive, and is free from discrimination, harassment, child labor and forced labor. This is essential to ensuring a decent work environment.

Initiative

- Toyota refers to and also respects the "United Nations Guiding Principles on Business and Human Rights" (UNGP) and promotes activities related to Human Rights based on these guidelines.
- Individuals working at Toyota respect Toyota's Human Rights policy and also align with the Sustainability Supplier Guidelines and implement Human Rights due diligence and educational activities.

Organizational Structure

Aim

- To ensure that the company is able to fulfill its corporate responsibility to respect Human Rights by embedding, implementing and conducting the necessary processes and actions.

Initiative

- The direction and challenges of the initiatives are reported to and discussed at the Sustainability Subcommittee. Key issues are then reported to the Sustainability Meeting for consideration and decision making. (The Sustainability Meeting thus supervises Toyota's sustainability initiatives.)
- Toyota's Chief Human Resources Officer oversees the responsibility for Human Rights within the organization.
- The Human Resources Division plays a central role for Human Rights management in collaboration with the Purchasing Group, the Sustainability Management Department and other organizations.
Policy development and dissemination

Aim

- Toyota’s Human Rights Policy applies to all executives and employees in Toyota and its subsidiaries. We also expect our business partners, including our suppliers, to understand and agree with this policy, and to work with us to ensure that their business operations respect this policy. This policy includes:
  - Respect for internationally recognized Human Rights in line with the UNGP and the Universal Declaration of Human Rights.
  - Compliance with international Human Rights obligations together with the laws and regulations of the countries in which we operate.

Development of Human Rights policies

- The Human Rights policy development was supported by the top management, and the policy was further developed utilizing feedback from internal divisions, the supply chain, and overseas affiliates. It was completed with advice from 3rd party specialist Human Rights organizations.

Dissemination within the company

- The Human Rights policy was disseminated to all employees through the internal Human Rights training contents.
  
  Education Related to Human Rights

  - Support and training were provided to specific divisions like Purchasing, Sales and Business Planning in order to integrate Human Rights within policies and processes.

Example

- This has so far led to the incorporation of specific Human Rights statements within Toyota’s Supplier Sustainability Guidelines, Dealer Basic Contracts, and into the new business planning guidelines.

Human Rights Due Diligence

Aim

- Continuously identify and assess risks related to Human Rights impacts on stakeholders, while at the same time ensuring mitigation and preventative measures are implemented.

Initiative

Identification and Assessment

- The methodology, process and actions are developed in line with various international standards and norms.
  - For issues related to the automotive industry, Toyota consults Human Rights experts and other relevant stakeholders to classify and analyze the risks from two viewpoints: the impact on stakeholders and relevance to Toyota’s business.1

Prevention

- Continuous Risk Monitoring operations include: Business partner collaboration, interaction with Human Rights associations, affected stakeholder consultations, and continuous Human Rights risk research.

Mitigation

- For each of the prioritized risks, Toyota develops a risk mitigation plan through an agreement with the affected stakeholders and suppliers while also being guided by specialist external bodies.
  - These plans are tracked on a monthly basis and reviewed annually by the human-rights-related functions to evaluate the progress and effectiveness, while the need for improvement is also determined.

Remedy

- Development and implementation of a Grievance Mechanism.
  - Internal: Speak up Hotline
  - Inter-Company: Toyota Helpline for Subsidiaries
  - Inter-Industry: JPMIRAI Speak up for Migrant Workers
  - Toyota Dealers: Helpline for dealers

Engagement with Business Partners (Supply Chain Due Diligence)

- Supplier Sustainability Guidelines includes a requirement for suppliers to ensure thorough compliance with laws and regulations, and to respect Human Rights.
  - Toyota works together with suppliers on risk monitoring, tracking and remediation, which then also allows for guidance and support for potentially affected stakeholders.
  - Methods for working with suppliers include:
    - Direct collaboration with Tier 1 suppliers and group companies.
    - Collaboration with other stakeholders for Tier 2 suppliers and deeper.

Engagement with stakeholders

- Toyota partners with external stakeholders to fully understand and align with societal expectations, while also maintaining legal compliance in all operations including the supply chain.

2022 Priority Salient Risks

- As a result of identifying and assessing our salient risks, Toyota has decided to prioritize the following risks for 2022: migrant labor, child labor, harassment and discrimination (diversity & inclusion).
  - If there are any other sudden or unforeseen salient risks that emerge in our business, we may review our priorities and conduct ad hoc due diligence activities.
Initiatives for Migrant labor (forced labor)

**Aim**

- Ensure decent and acceptable working conditions, which include freedom of movement, fair treatment, and proper employment contracts for migrant workers in our business operations and supply chain.

**Initiative**

- Migrant labor has been identified as one of the salient issues since 2019.
- As part of our due diligence activities, we have been working with non-governmental organizations to ensure fair working conditions for migrant workers within our affiliates and suppliers both inside and outside Japan.

**Guidelines and declaration development**

- Guidelines have been developed to help eliminate possible exploitation by unscrupulous employment agencies charging high recruitment fees, as well as ensuring freedom of movement, fair treatment, and proper employment contracts for migrant workers.

**Participation in the formulation of ASSC Tokyo Declaration 2020.**

"In these surveys, "migrant workers" refer to non-normal (permanent, temporary, etc.) foreign national workers with a status of residence (non-permanent) for the purpose of "attending or taking part in professional training, or acquiring technical skills to be used in the home country, etc.

**Risk Assessment**

- A task force was assembled to conduct comprehensive surveys to grasp the current situation at Toyota subsidiaries both in Japan and overseas, specifically to determine the number of migrant workers. The following surveys were conducted in 2020.

### [Survey 1]

- **Survey scope**: Toyota’s domestic and overseas subsidiaries
- **Survey description**: The number of migrant workers
- **Survey results**: No infringements are being placed upon migrant workers at local operations and at our subsidiaries.

### Migrant workers at Toyota Subsidiaries by region

*In these surveys, "migrant workers" refer to non-normal (contract, non-permanent, temporary, etc.) foreign national workers with a status of residence (non-permanent) for the purpose of employment (excluding expatriates from other companies/countries).*

### [Survey 2]

Through dialogue with external stakeholders, we recognized that a survey was needed which focuses on foreign technical internship trainees; those who are at high risk of debt bonded labor, due to the following points.

- The number of migrant workers had increased significantly in Japan as a whole and in Toyota’s domestic affiliates as well.
- There was a risk that migrant workers hired by both the employment agencies in the sending countries and the supervisory organizations in Japan could result in forced labor due to exorbitant fees being charged, which subsequently traps them in serious debt.

**Survey scope**: Group companies and their major Tier-1 suppliers
- Toyota’s own major Tier-1 suppliers.
- 1,117 operations in 119 job categories, and trainees are dispatched to 113 foreign technical internship trainees to the home country, etc.

**Survey results**: Through the surveys, it was identified that among Toyota’s Tier-1 suppliers, 113 companies employ trainees via both employment agencies in the sending country and supervising organizations in Japan.
- Countries that dispatched technical internship trainees were mainly comprised of China and various South East Asian countries such as Vietnam, Laos, Thailand, and Indonesia.

Collaboration with JP-MIRAI

In 2020, Toyota was part of the initial body that led to the establishment of the "Japan Platform for Migrant Workers toward a Responsible and Inclusive Society (JP-MIRAI)," which has now grown to be a multi-stakeholder framework for resolving issues faced by migrant workers in Japan. In May 2022, JP-MIRAI launched a grievance mechanism trial for migrant workers.

This mechanism aims to resolve issues in an appropriate and timely manner, and has the support and cooperation of Toyota.

Contents of the services provided:
- A multilingual web portal and application that provide relevant information on living and working in Japan.
- A grievance mechanism for making complaints.
- An Alternative Dispute Resolution (ADR) mechanism.
- Over 400 members, consisting of various stakeholders such as private companies, local governments, NGOs, academics, and lawyers.

Information Disclosure

From 2021, Toyota's action taken for Forced Labor of Migrant Workers (Statement on the Modern Slavery Acts) is disclosed.

Initiatives for Wage

Aim

- To secure necessary human resources and build a sense of security for employees, pay appropriate level of wages.

Initiative

- If the minimum wage increases, revise employee compensation as necessary.
  - To improve the compensation for temporary workers, Toyota provides family allowance, subsidizes meal costs, grants special leave, and established channels allow for the conversion of variable workforce employees to permanent employees, making their conditions equivalent to those of permanent employees.

Initiatives for Working Hours

Aim

- Secure, manage and efficiently allocate work hours based on laws/ regulations and labor practices so that employees can have a sense of security and flexibly respond to fluctuations in production.

Initiative

- Based on thorough labor-management communication, set flexible working hours appropriate for actual conditions, such as the situation of each workplace and the characteristics of individual work. In the case of excess working hours above legal limits, Toyota follows due process relating to legal procedures.

Initiatives for Anti-harassment

Aim

- Toyota does not tolerate any form of harassment, such as sexual harassment, power harassment, or any act that harms the dignity of any individual.

Initiative

- Employment rules specify clearly the prohibition of harassment and disciplinary provisions in the case of harassment.
  - The Toyota Code of Conduct clearly states that Toyota should not tolerate any form of harassment.
  - Internal anti-harassment training programs for all employees, from executives to regular employees, to ensure compliance with the code of conduct.
  - Toyota’s external and internal hotlines have been integrated into the “Speak up” Hotline as a system that enables early detection and resolution of employees’ problems and workplace issues.
  - Have training conducted by psychology experts to look deeply into the mental side of individuals, with the aim of not only preventing harassment but also helping the creation of workplaces where members can work happily.
Initiatives for Precarious Work

**Aim**
- Our businesses require personnel equipped with both advanced skills and a deep understanding of Toyota’s values. In order to achieve this, a long period of time is required to cultivate such personnel. Therefore, Toyota strives to provide stable employment even when the external environment is harsh.
- Due to demand fluctuations in the automotive industry, Toyota hires temporary personnel for fixed periods, based on the customs and labor laws of each region, while also ensuring fair working conditions.

**Initiative**
- Based on the customs and labor laws of each region, Toyota practices the following:
  - Confirms the composition of employees at affiliates in various countries, and for non-permanent employment relationships, we identify affiliates requiring prioritized examination.
  - Dispatches associates to identified affiliate sites, where they work with the subsidiary in question to enhance communication with and training for employees regarding Toyota’s policies concerning freedom of association and legal compliance.

Initiatives for Freedom of Association

**Aim**
- Toyota’s “Respect for People” management-philosophy aims to respect individual capabilities, ways of thinking, and creativity, and harness them fully.
- Based on the Universal Declaration of Human Rights, we respect our employees’ right to freely associate while also respecting their right not to be compelled to belong to an association in compliance with the laws of the countries in which we operate.
- We take every opportunity to engage in thorough dialogue with employees and build healthy labor relations regardless of whether or not there is a union.

**Initiative**
- Along with the collective agreements in place with our unionized affiliate companies both in Japan and overseas, we also have Labor-Management Joint Declarations established in Japan (1962), Thailand (1993), Indonesia (2004) and Brazil (2015) as a global framework, in order to agree on a universal philosophy of labor relations.
  - Cooperation with subsidiaries:
    - In order to determine the level of communication with employees and other issues related to freedom of association, we periodically send out and collect questionnaires from our subsidiaries and request that improvement be made to policies and activities based on the responses.
    - For subsidiaries that required concentrated initiatives, associates from Toyota Motor Corporation were dispatched to review policies and activities, and worked with the subsidiary in question to enhance communication with and training for employees regarding Toyota’s policies concerning freedom of association and legal compliance.
  - Cooperation with suppliers:
    - As a part of its global due diligence activities, Toyota investigated some cases of possible infringement on Freedom of Association within the supply chain, and recommended corrective actions. (2019–2021: 3 cases)

Initiatives for Child Labor

**Aim**
- Toyota does not accept any forms of child labor, which deprives children of educational opportunities and inhibits their growth and development.
- In line with international norms, we adhere to the following conditions:
  - The minimum age for employment shall be 15 years of age, the legal minimum age for employment, or the age of completing compulsory education, whichever is the highest under the local applicable laws and regulations.
  - Do not use employees below 18 years of age for hazardous work.
  - Bona fide job training or apprenticeship programs permitted under applicable local laws and regulations.

**Initiative**
- Enhance due diligence activity in the high-risk sector of child labor in our supply chain.

Responsible Mineral Procurement

Education related to Human Rights
**Responsible Mineral Procurement**

**Aim**
- Toyota has formulated its Policies and Approaches to Responsible Mineral Sourcing based on the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-affected and High-risk Areas. Based on these policies, Toyota has been implementing measures to avoid human rights issues, such as child labor and forced labor.

**Investigation and disclosure on the use of Conflict Minerals (Compliance with the U.S. Dodd-Frank Act)**
- Since 2013 Toyota has been conducting a reasonable country-of-origin inquiry every year with due diligence throughout its global supply chain in accordance with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-affected and High-risk Areas. The company requests that the suppliers make corrections if there are any errors and/or omissions in their responses, in order to improve the effectiveness of our efforts.
- Toyota has been engaging in the activities of the Conflict-free Sourcing Working Group and the working group of the Automotive Industry Action Group (AIAG) on conflict minerals originating from the Democratic Republic of Congo.

**Example**
- Background surveys of smelters/refiners, prodding smelters/refiners to participate in the Responsible Minerals Assurance Process (RMAP).

**Responsible Cobalt Procurement**
- Toyota has been advancing activities to clarify the supply chain related to cobalt, a major component using cobalt, using the Cobalt Reporting Template, or CRT, provided by RMI, and has identified several smelters (as of March 31, 2020). We will continue conducting investigation.
- If any risk is identified as a result of the survey, we will implement appropriate measures to mitigate the risk.
- In cooperation with the Responsible Minerals Initiative (RMI), Toyota Motor North America (U.S.) has been engaging in the activities of the Conflict-free Sourcing Working Group and the working group of the Automotive Industry Action Group (AIAG) on conflict minerals originating from the Democratic Republic of Congo.

**Example**
- Background surveys of smelters/refiners, prodding smelters/refiners to participate in the Responsible Minerals Assurance Process (RMAP).

**Education related to Human Rights**

**Aim**
- In order to promote understanding of Human-Rights-related matters and to encourage actions towards open and honest communication as well as to advance non-discrimination, Human Rights training is aimed at our executives, employees and business partners.

**Initiative**
- **Human Rights in general**
  - Training for: Executives (Toyota Motor Corporation)
    - Main initiatives
      - Explanation of international Human Rights guidelines and their expectations, the responsibilities required of companies, and key Human Rights issues
  - Training for: All employees (Toyota Motor Corporation)
    - Main initiatives
      - Learn about the expected corporate and individual responsibility and its scope in line with international norms together with human rights infringement examples, thereby helping compliance with Human Rights in daily operations
  - Training for: Top management and HR employees to be transferred to overseas affiliates (including the main suppliers)
    - Main initiatives
      - The training content promotes positive labor-management communications which include information on past labor disputes, labor-management negotiations, and the latest trends in Human Rights, international norms, and regulations
  - Training for: Purchasing function employees to be transferred to overseas affiliates (Toyota Motor Corporation)
    - Main initiatives
      - Primarily to support their daily purchasing responsibilities at their overseas posting. The training will involve lectures for building healthy labor-management relationships at local suppliers, including lectures related to Human Rights.

**Anti-harassment**
- Training for: Employees, including executives, supervisors, management, expatriates and new hires (Toyota Motor Corporation)
  - Main initiatives
    - Awareness of the prevention of harassment in various situations
    - Fiscal 2022 Results.
      - All senior professionals/senior management and all professionals/management: Approximately 8,000 employees, 3,000 hours.
      - All assistant managers and all those in lower ranks: Approx. 20,000 employees, 6,500 hours.
      - All shop floor employees: Approx. 42,000 employees, 10,400 hours.
  - Training for: Supervisors (Toyota Motor Corporation)
    - Online training by specialists in mental science
    - Fiscal 2022 Results
    - Supervisors: Approx. 12,000
**Fundamental Approach**

**Aim**
- Toward the transformation from a car company into a mobility company and continuous innovations in existing areas, create an attractive workplace where employees with wide-ranging skills and values can demonstrate their abilities to the fullest.

**Initiative**
- Nurture opportunities where all employees can demonstrate their full potential.
- No tolerance of any form of discrimination at the workplace such as discrimination based on gender, age, nationality, race, ethnicity, creed, religion, sexual orientation, gender identity, disability, marital status, or the presence of children, etc.
- Create a work environment with no harassment.

---

**Organizational Structure**

**Aim**
- Build a structure that can develop, agree on, and implement policies and initiatives to promote Diversity and Inclusion at Toyota globally.

**Initiative**
- The direction and challenges of the initiatives are reported to and discussed at the Sustainability Subcommittee. Key issues are then reported to the Sustainability Meeting for consideration and decision making. (The Sustainability Meeting thus supervises Toyota’s sustainability initiatives.)
- The Human Resources Department plays a central role in developing global Toyota-wide measures tailored to each region.
- We have set up dedicated diversity and inclusion promotion organizations in Toyota Motor Corporation (Japan), Toyota Motor North America (U.S.), Toyota South Africa Motors (Pty) Ltd. (South Africa).
- In many regions we have established diversity and inclusion promotion organizations consisting mainly of concurrent appointments within the area of human resources.

- Toyota Motor Corporation was awarded the Gold Prize in PRIDE INDEX, presented by “work with Pride”, one of the volunteer associations supporting the facilitation and establishment of diversity management of sexual minorities. In addition, Toyota Motor Corporation also received the Best Practice Prize in PRIDE INDEX for Rainbow Match, one of the official games for our Softball team which was evaluated as an opportunity for realizing and considering LGBTQ+ through sport.

- Toyota Motor North America won 4th place in the general division of the Top 50 Companies for Diversity 2021 ranking announced by U.S. Diversity Inc.
**Women’s Activity**

**Aim**
- Promote gender diversity and create a more diverse and inclusive workplace. (Particularly important issue for Toyota Motor Corporation in Japan.)

**History of Initiatives**
- **2002:** Launched “Initiatives centered on expansion and establishment of measures to support work-life balance” from 2012: Enhancement and active support of environment that can support women to gain motivation and support their participation (especially development of female managers)
- **From 2021:** Unconscious bias training for all management and supervisors in the company
- **From 2022:** Strengthen diversity training (basic courses and management courses)

**Overall Image of Initiatives to Promote Women’s Participation in the Workplace**

**Changes**
- **2002:** Expanded programs on retention of and opportunities for women
- **2007:** Expanded programs to promote retention

**Measures**
- Reduced working hours and expanded childcare leave
- Expanded (up until children reach fourth grade of elementary school)
- Support for early return to work from maternity leave
- Introduced day care for sick children/overnight daycare
- Introduced childcare support for childcare facilities

**Overview**
- **Phase 1:** Expansion of Programs
- **Phase 2:** Focus on Retention
- **Phase 3:** Retention + Increased Opportunity

**Action Plan Based on the Act on Advancement of Measures to Support Raising Next-generation Children**

</table>

**Goal**
- Promotion of female employee participation and advancement in the workplace

**Target**
- To increase users of the teleworking system to more than 50 percent of all employees (except for production workers and managers) by 2025, irrespective of whether teleworking for childcare or nursing purposes

**Our Challenge**
- The teleworking system is not utilized enough yet.
- The creation of an environment that supports the use of teleworking, and informing our employees: Expansion of the use of IT tools so that there is no top difference between working in the office and teleworking (from 2020)
- Cultural Transformation: Transformation to a work culture that does not make teleworking an inconvenience or a hindrance (from 2020)

**Toyota’s plan to build an environment to promote women’s participation in the workplace**

1. **Implementation period**
   - April 1, 2021 to March 31, 2023

2. **Provision of work-life opportunities for female employees**

   - **Our Challenge**
     - The ratio of females in managerial positions is low (continuation of our activity from 2016-2020 is necessary).
     - The number of females in managerial positions in 2014 to be increased fourfold by 2025, and fivefold by 2030

   - **Target**
     - Hiring: To maintain certain hiring rates for female graduates (40% or above for administrative positions and 10% or above for engineering positions) and active hiring of women throughout the year (continuation from before 2020)

   - **Our Course of Action**
     - **Hiring**: To maintain certain hiring rates for female graduates (40% or above for administrative positions and 10% or above for engineering positions) and active hiring of women throughout the year (continuation from before 2020)

   - **System Development**: The creation of a system that reports on the progress of female training in each department to our board members (from 2020)

   - **Employee Training**: The development and implementation of a plan for individual employee training (completion from before 2020)

   - **Teleworking**: Host a global women’s conference and symposium that the managerial class and female promotion candidates can participate in (from 2018)

**Detailed Actions**
- **Am 1**: Promotion of growth and active participation of diverse human resources
  - Further enhancement of labor-management communications to encourage growth and active participation of diverse human resources, including those who are balancing work and childcare (from 2021)
  - Implementing measures to further promote “honest dialogue” between managers and their subordinates (from 2021)

- **Am 2**: Promotion of understanding and dissemination of various systems/samples related to balancing work and childcare
  - Improving usability of the website to provide information for balancing work and childcare (from 2021)
  - Introducing an email notification service for information updates
  - Adding a “page search” function
  - Introduction and enhancement of various case studies and Q&As

- **Am 3**: Promotion of male employee participation in childcare
  - Providing and improving information related to male employee participation in childcare through the company newsletter (from 2021)
  - Providing experience reports of male employees who have taken childcare leave
  - Providing data on results and trends of Toyota male employees’ participation in childcare
  - Enhancing guidance on the use of systems and procedures (providing guidance for male employees)
Support for Keidanren’s “Challenge to 30% by 2030”

Toyota Motor Corporation expresses its support for the initiative and has been working toward the target in accordance with Toyota Motor Corporation Action Plan for the promotion of female employee participation and advancement in the workplace.

*1 The Keidanren’s NEW Growth Strategy is intended to accelerate initiatives to encourage the utilization of diverse human resources and sets a specific target of 50% or more executive positions being filled by women by 2030 as one way of driving these changes.

Initiatives at All Ranks

Initiatives are promoted in all ranks, from development and expansion of next-generation human resources to securing diversity in top management.

Major items

**Next-generation development and expansion**
• Together with 9 group companies, Toyota established the Toyota Female Engineer Development Foundation in 2014 to contribute to the promotion of women’s participation in manufacturing businesses in Japan.
• Attract and expand the number of girls studying in scientific fields and foster female engineers in monozukuri (manufacturing).
• The Foundation provides a development program for female engineering university students to support career building as well as a scholarship program that provides financial support.

**Recruitment**
• Target for % of female new graduates: 40% for administrative positions and 10% in engineering positions (the percentages of women in the relevant labor market).
• The percentage of women hired as shop floor employees has also been steadily increasing.

**Career development support**
• Use of Individual Development Plans
• Establishing an appropriate development environment and assigning the roles required at each stage: when working as an employee before childbirth and when balancing work with childcare.
• Career Return System
• Providing reemployment opportunities to employees who are forced to leave Toyota because of the job-related relocation of their spouse (regardless of the spouse’s gender or whether the spouse is a Toyota employee) or the need to provide nursing care.
• Career continuation support system for Toyota employees who are moving with a spouse who is relocated overseas.

Support for balancing work and childcare

• Infertility treatment system
• Available holidays: 20 days/year
• Leave system: Up to 2 years per child
• Promote awareness-raising activities through training, etc., and create a workplace culture.
• Pre-Maternity Leave Seminar, Supervisor Career Interviews for employees who take maternity leave
• Target: Employees taking maternity leaves
• Purpose: Ease employee concerns about balancing work and childcare
• Stimulate employees’ desire to continue to develop their careers after returning to work.
• Content:
• Employees examine their career plans and how best to achieve them.
• Sharing examples from employees who successfully balanced work with family commitments and participation in roundtable discussions.
• Teleworking system
• Removing time and location restrictions, to allow employees to continue working while taking care of their children (except for employees at production sites).
• Expanding flexible workstyle at production sites where working from home is difficult.
• Onsite Childcare Facility (3 locations)
• For workers at plants and nurses who work the night shift, childcare in the early morning hours as well as overnight stays, shuttle service from nearby plants for children transport are offered.
• The facility also accepts new enrollments throughout the year to accommodate the needs of employees including those who intend to return to work early after childbirth, mid-career employees and employees returning to Japan from overseas assignments.
• Installation of “PIPOLAND” is available to Toyota City residents and allows Toyota Motor Corporation to build stronger ties with the local community in support of promoting work-life balance and childcare.

Promotion to managerial positions

• Achieve 2025 target (the number of females in managerial positions in 2014 to be increased fourfold by 2025). To accelerate company-wide initiatives, plans and measures of each division are gathered by the personnel function and reported to the Sustainability Meeting.
• Development measures tailored to individual employees are also implemented at each workplace. -assigning a challenging role equivalent to a higher-rank position to candidates for promotion
-appointing a mentor for management candidates or members immediately after promotion

Fiscal 2022 Results

• Ratio of female managers: 3.0% (Toyota Motor Corporation)

Developing candidates for senior professional/senior management positions

• Development of candidates through succession plans and through hiring competent mid-career female top management.
• The number of women in top management who have been promoted through internal development programs is also increasing.

Results as of April 2022

• 12.5% * of operating office positions were held by women in Toyota Motor Corporation.

Diversity among Members of the Board of Directors and the Audit & Supervisory Board

• Directors are appointed with comprehensive consideration and based on their past achievements and experience regardless of their gender, nationality or any other factors, with the aim of placing the right person in the right position.

Results as of April 2021

• Percentage of Female Directors and Audit & Supervisory Board Members: 13.3% (2 out of 15)
Initiatives at Major Global Operations

Toyota Motor Europe NV/SA (Belgium)

- Held company-wide events during the week of International Women’s Day (Video message by top management, workshops, etc.)
- Working couple support: Home-working system, part-time working regime, support in finding employment for spouses of employees sent to TME.
- Female career development: Mentorship system, sponsorship system
- Female employment targets.
- Active hiring of promising candidates into career positions.
- Conducted unconscious bias awareness training for all managers.
- Set targets in employment and management positions.

Toyota South Africa Motors (Pty) Ltd. (South Africa)

- Leadership management workshops to ensure acceptance of women and promote their participation and advancement in the workplace.
- Set employment targets.
- Networking to promote gender diversity.
- Active hiring of promising candidates into career positions.
- Conducted unconscious bias awareness training for all managers.
- Set targets in employment and management positions.

KPIs Related to Promotion of Women’s Participation in the Workplace

We are continuing initiatives that promote women’s participation and advancement in the workplace so that the percentage of positions held by women, from initial hiring to executive positions, will consistently increase at many affiliates.

*Figures cover 46 overseas locations, including Japan.

Toyota Motor (China) Investment Co., Ltd. (China)

- Breastfeeding break of up to one hour each day for lactating female employees.
- Set up nursing rooms.

Toyota Motor North America (U.S.)

- Annual North American Women’s Conference, to which all executive level women and many high-potential junior level women, as well as male directors and executives are invited to attend for networking and encouraging women’s participation and advancement in the workplace.
- Executive D&I scorecards have KPIs on managers making improvements in their areas to promote initiatives.
- Established the Outside Advisory Committee Focusing on Diversity, which is responsible for monitoring and reporting on the progress of diversity, including career development for women.
- Set childcare facilities at multiple operation sites to allow flexible workstyles for employees taking care of their children.

Toyota Daihatsu Engineering & Manufacturing Co., Ltd. (Thailand)

- Set up nursing rooms.
- Female prayer room.
- Reserved parking area for pregnant employees.

Toyota do Brasil Ltda. (Brazil) + Toyota Argentina S.A. (Argentina)

- Designated Women’s Day, which promotes an open conversation about the challenges women face in balancing their professional and personal lives.
- Healthy pregnancy program for pregnant employees: Guidance and advice related to health conditions, as well as orientation on breastfeeding and baby care.
- Conducted unconscious bias awareness training for all managers.
- Set employment targets.
- Held dialogue between human resources division and management to promote diversity within the company.
- Introduced the mentor system to support female leaders.
- Introduced Soft-Landing Program in support of employees returning to work after childbirth.
- Support for nursing care costs for employees who return to work early.
- Provide all employees with children with equipment necessary for school.
Nursing Care Support

**Aim**
- Support each individual to feel secure and realize a working style matching the needs based on his/her life stage. (e.g. breaking bias by promoting housework for male employees, reducing the concerns and burdens of employees with childcare, caregiving)

**Initiative**

**Major Initiatives in Nursing Care**

</table>

**Male Child Care Participation**

- Achieve 30% of male employees taking childcare leave by 2025 (in line with government target)

Promote the development of a supportive working environment:
- Strengthening Diversity Training.
- Deploying system to flexibly support the absence of employees on childcare leave both inside and outside the workplace.
- Confirm intention to take childcare leave and career life plans during career interviews with supervisors. (from 2022)
- Efforts to resolve problems are also promoted through holding management discussion sessions to learn about problems at work.

**Fiscal 2022 Results**
- Ratio of male employees taking childcare leave: 19.4% (Toyota Motor Corporation)
Inclusion of Persons with Disabilities

**Aim**
- Realization of a "symbiotic society" in which people work together and live together regardless of the presence or absence of disabilities.

**Initiative**

**Toyota Motor Corporation (Japan)**
- To foster a corporate culture of understanding and empathy among employees throughout the workplace, various activities are implemented
  - Mental Barrier-Free Training (Wheelchair Experience Sessions, Mental and Developmental Disabilities Sessions, etc.)
  - Sign language courses
  - Implementation of study sessions for assigned workplaces
- Support for assuring full skill application at work
  - Setting up a privacy-preserving consultation service
  - Introduction of special vacation system that can be used for outpatient visits, etc.
  - Dispatch of sign language interpreters
- Distribution of various support tools
- Development of facilities
  - Installation of a parking lot exclusively for people with disabilities
  - Maintenance of universally accessible toilets
- Employment rate of people with disabilities (results)
  - 2.50%* (as of June 2022)

**Toyota South Africa Motors (Pty) Ltd. (TSAM, South Africa)**
- Setting KPIs related to employment of people with disabilities allows TSAM to promote initiatives to improve the working environment for them in terms of facilities and culture.
- Setting up a special program to provide additional financial support to persons with disabilities for vehicle costs (to cover the increased cost associated with owning a special vehicle).

---

**Toyota Loops (special-purpose subsidiary)**
- Started business in 2009
- As of June 2022:
  - 357 people with disabilities employed

<td>Employees with disabilities participate in evaluations of the usability of Toyota's assisted-mobility vehicles from the users’ viewpoints. Based on this evaluation, the opinions of real users, including the small details that only users can notice, can be incorporated in the quality of the vehicles.</td>
</tr>
</tbody>
</table>

**Activities outside of work**
- Participation in the Abilympics (Skills Competition for the Disabled) as a representative of Aichi Prefecture
  - 2019: bronze award in the Office Assistant division
  - 2020: gold award in the Photography division, silver in the Word Processor division and bronze in both the Office Assistant and Database divisions
  - 2021: gold award in the Database division, silver in Word Processor division and bronze in Product Packing Category

**Support system**
- The number of support staff has also been increased to eliminate or reduce any anxieties that employees may have regarding their health or work.
- A consultation hotline has been set up and consultations with an industrial physician are provided
- Counseling by a clinical psychologist or psychiatrist
- Active information exchange with governmental bodies, local communities, and social welfare organizations
Inclusion of LGBTQ+ Employees

**Aim**
- Promoting an appropriate understanding, recognition, and acceptance with respect for personal identity and orientation.

**Initiative**

**Toyota Motor Corporation (Japan)**
- Recruiting and hiring process
  - Graduates are not required to fill in their gender on their job application sheets.
- Introducing measures at facilities
  - Establishing an internal harassment consultation hotline.
  - Setting up gender-neutral restrooms.
- Internal system
  - From July 2020, employees in same-sex marriages or common-law marriages have been eligible for the same internal benefit systems as those in legal marriages (holidays, employee benefits, etc.).
- In-house training
  - Basic training of LGBTQ+ for all employees and executives. (mandatory)
  - Training by outside instructors (LGBTQ+). (voluntary)
- ALLY* registration system
  - Approximately 21,000 employees, as of August 2022, have registered as ALLYs.
- Rainbow Match
  - Held an event in our official female softball match in conjunction with Toyota City (Exhibition of Toyota City and Toyota’s LGBTQ+ Initiatives)

**Toyota Motor North America (TMNA, US)**
- Recruiting and hiring process
  - We have a nondiscrimination statement that the company does not discriminate based on gender, ethnicity, and many other categories, including LGBTQ+.
  - No photo or gender identification required on resumes
- Installation of facilities
  - Setting up gender-neutral restrooms at key locations
- Education and Awareness
  - One of our business partner groups (organizations representing the interests of minorities) is an LGBTQ+ group conducting education and enlightenment activities.
- ALLY System
  - Implementation of activities focused on increasing the number of ALLY members

* An ALLY is a person who aligns with those facing problems or difficulties and addresses these challenges on their own initiative while thinking of these issues as a personal matter. This term is derived from the word "alliance" that means a union or an association.
Initiatives Related to Race and Nationality Promotion

Aim

- Promoting racial and nationality diversity according to local conditions.

Initiative

Toyota Motor North America (TMNA, US)

- Implementing education and enlightenment programs as means of promoting understanding and diversity.
- Promote diverse top management.

Toyota South Africa Motors (Pty) Ltd. (TSAM, South Africa)

- In the Republic of South Africa, TSAM promotes activities in line with the Broad-Based Black Economic Empowerment (B-BBEE) policy aimed at economic development and creation of employment in South Africa.
- TSAM has acquired Level 7 as of January 2021.

Employment for Over 60s

Aim

- Support employees to have diverse lifestyles and assure them that they are respected for their willingness and ability to work in a rewarding manner also after the age of 60.

Initiative

Toyota Motor Corporation

Year | Major Items
--- | ---
1991 | Introduction of an internal re-employment system for skilled retirees
2001 | Optional Re-employment Application System was launched to outplace applicants to external affiliates and other sites, providing a framework for helping over 60s to continue working.
2006-2013 | Based on the revisions to the Law on Stabilization of Employment of Elderly Persons in 2006 and 2013, the support was revised to expand re-employment by taking surveys and interviews based on the needs of the employees.
2016 | Advanced Skilled Partner System was set up for shop floor employees to encourage and motivate employees to keep working after 60 by maintaining their job rank and salary at the time of their statutory retirement at 60.
Fundamental Approach

Aim

- Enhancing further the Customer First policy by promoting collaborative activities with our business partners including suppliers and dealers.

Initiative

- Toyota promotes open and fair business practices and is making constant progress with initiatives to promote sustainability. We are also working closely with suppliers and dealers to improve quality, as well as providing safety and peace-of-mind to our customers, to achieve a high level of customer satisfaction.

Initiative with Suppliers

Aim

- Achieve mutual benefits based on mutual trust.
- Pursue manufacturing in close partnership with our suppliers.

Initiatives Related to Our Basic Purchasing Policies

- Implementation of our Basic Purchasing Policies worldwide
- Before any transactions are made with a new business partner, an agreement is signed stipulating the requirements for legal compliance, respect for human rights, and consideration of both the regional and global environmental issues.

Toyota's Basic Purchasing Policies

1. Fair Competition Based on an Open-door Policy
   Toyota is open and fair to any and all suppliers, regardless of nationality, size, or whether they have done business with us before. We evaluate suppliers by quality, technological capabilities, and reliability in delivering the required quantities on time, and their efforts in addressing social responsibilities, such as environmental issues.

2. Mutual Benefit Based on Mutual Trust
   We develop mutual benefit in long-term relationships. To foster trust, we engage in close communication with suppliers.

3. Localization with Good Corporate Citizenship
   We actively procure from local suppliers, including parts, materials, tools, equipment and other materials. In this way, we aim to contribute to the local society and be a good corporate citizen.
Organizational Structure

- The direction and challenges of the initiatives are reported to and discussed at the Sustainability Subcommittee. Key issues are then reported to the Sustainability Meeting for consideration and decision making. (The Sustainability Meeting thus supervises Toyota’s sustainability initiatives.)
- Supervisor: Chief Officer and Deputy Chief Officer of the Purchasing Group
- The Purchasing Group takes a lead in promoting initiatives in cooperation with divisions related to the environment, human resources, and compliance as well as the Sustainability Management Department.

Sharing Toyota Supplier Sustainability Guidelines

- Importance of sustainability initiatives is communicated towards suppliers with a request that suppliers carry out their business activities in line with the Sustainability Guidelines (established in 2009, last revision in November 2021).
- Revisions in 2021: Sections related to the environment and human rights were expanded to reflect the increasing importance of environmental and human rights issues.
- Over 90% of Toyota’s suppliers in Japan have added their legal representative sign to the list of suppliers that support the purpose of the Guidelines (as of July 2022).
- The Guidelines clearly indicate that suppliers in Tier-1 must expand the implementation of the Guidelines to suppliers in Tier-2 and beyond in order to disseminate these principles throughout the supply chain.
- The Guidelines have also been implemented globally to overseas suppliers.

Compliance and Implementation of the Guidelines

- Checks using self-inspection sheets
- All Toyota suppliers are requested to periodically check the status of their implementation using a self-inspection sheet.
- Major Tier-1 suppliers (approx. 350 companies as of October 2020), which account for over 90% of our purchasing volume in Japan, are asked to submit the results of their self-inspections so that Toyota can confirm the progress of their initiatives.
- Self-inspections based on the latest Guidelines (revised in November 2021) are scheduled for implementation in the near future.
- Responses when problems are identified
  - The facts related to the issue are investigated and, if an issue is identified, we will communicate with the suppliers concerned and ask them to make improvements.
  - If no improvements are made, business relationship may be reconsidered.
  - To prevent issue recurrence at other suppliers, notices explaining the issue are sent and suppliers are asked to implement preventative measures.
- In 2020, our company asked suppliers to provide better assistance to foreign technical internship trainees who were unable to return to their home countries during the COVID-19 pandemic.

Preventing Bribery

- In order to eliminate all forms of bribery, Anti-Bribery Guidelines have been adopted and shared with suppliers.

Supplier Hotline

- An anonymous hotline has been established for suppliers to report any actions that could potentially violate laws, regulations, and/or business norms.

Awareness-Raising Activities

- Within Toyota Motor Corporation: Activities to educate and raise awareness among all employees, including buyers.
- For suppliers: Promoting initiatives that involve voluntary activities at suppliers.

Recent seminars:
- Foreign technical internship trainees (2020)
- In a 2019 survey, a number of suppliers responded that they had employed foreign technical internship trainees from Vietnam. These suppliers were given a briefing detailing Toyota’s stance and initiatives intended to ensure that trainees are not charged exorbitant fees.
- Briefing on achieving carbon neutrality (2021 and 2022)
- Dissemination of specific emission reduction calculation methods and tools to achieve CO2 reduction targets
- Presentation about items to reduce CO2 emissions
- Implementation of a matching service to link companies providing emission reduction solutions with suppliers that are having trouble reducing their emissions
- Suppliers in Tier-1 encourage suppliers in Tier-2 and beyond to participate in the initiatives above in an effort to disseminate this information throughout the supply chain.
Voluntary activities by suppliers*1
Round-table conference for corporate executives
• A regular event intended to encourage corporate executives to take a leading role in promoting activities.
• In 2021, participants from Toyota Motor Corporation also attended to discussions about carbon neutrality which included information sharing, issue identification, and response considerations.
Kyohokai Environmental Research Group and Eihokai SDGs Study Group
• Suppliers engage in dialog with each other to achieve mutual awareness, better understanding, and the promotion of initiatives.

Volunteer activities
*1 Carried out by Toyota’s supplier associations Kyohokai and Eihokai

Other initiatives with suppliers
- 759 Initiatives for Migrant labor (forced labor)
- 762 Responsible Mineral Procurement
- 763 Responsible Cobalt Procurement
- 769 Quality – Initiatives with Suppliers
- 763 Information Security – Initiatives for Supply Chains

Initiative with Dealers

Aim
Based on the “Customer First, Dealer Second, Manufacturer Third” concept, we will work with dealers to meet customer expectations and increase customer satisfaction.

Support for Toyota Dealers*2 to Enhance Compliance
*2 The Toyota National Dealers’ Advisory Council (TNDAC) is an organization comprised of Toyota dealers in Japan

TNDAC initiatives
- Dealers implement activities related to priority topics every month in accordance with “The Legal Compliance Manual”
  - Details: Overview and checklists related to the following laws:
    - Laws related to safety and the environment (Road Transport Vehicle Act, End-of-life Vehicle Recycling Law)
    - Laws related to labor and employment of employees (Labor Standards Law, Industrial Health and Safety Act, Act on Securing, etc. of Equal Opportunity and Treatment Between Men and Women, laws and ordinances related to harassment)
    - Laws related to transactions (Antimonopoly Law, Subcontracting Law)

*3 Tools to support voluntary legal compliance activities by dealers
- TNDAC Helpline
- Repeated notices to dealers and employees to prevent and quickly detect any legal or regulatory violations

Support from Toyota
- Implemented the following initiatives in response to designated vehicle maintenance violations and improper handling of personal information by dealers. (From FY2021 onward)
  - Compliance seminars for dealer representatives and other personnel
  - Supporting improvement activities at dealers by disseminating TPS (Toyota Production System) know-how and holding training sessions
  - Supporting dealers’ initiatives through the distribution of a Privacy Governance Guidebook reflecting amendments of the Act on the Protection of Personal Information made in April 2022
  - Disseminating Toyota Motor Corporation’s Human Rights Policy to dealers
- The policy has a particular focus on appropriate management of foreign technical internship trainees and creating harassment-free workplaces
Fundamental Approach

**Aim**
- Toyota’s ultimate goal – Zero Casualties from Traffic Accidents.

**Initiative**
- Promotion of our integrated three-part initiative for people, vehicles, and the traffic environment.
- Pursuing real-world safety by learning from actual accidents and incorporating that knowledge into vehicle development.
- Moving forward with the development of technologies for accident prevention, collisions, and emergency rescue based on our integrated safety management concept.

Integrated Safety Management Concept

**Aim**
- Toyota’s approach to pursue high levels of safety by reinforcing links between vehicle safety systems rather than thinking about each system as a separate component system.
- Integrated Safety Management Concept

**Initiative**
- Toyota provides optimum driver support for reasonable safety in each stage of driving, from parking to normal operation, the moment before a collision, during a collision, and post-collision emergency response.

Integration of Individual Technologies and Systems

Optimal support in each stage of driving

Linked safety systems
### Active Safety

#### Aim
- Contributing to a reduction in serious traffic accidents causing death or injury by utilizing safety functions focusing on assistance to avoid collisions with cars and reduce damage, assistance to prevent accidents caused by leaving the lane, and support ensuring optimal forward visibility during nighttime driving.

#### Initiative
- **Toyota Safety Sense (Active Safety Package)**
  - A package of multiple active safety functions that help reduce serious traffic accidents causing death or injury.

- **Toyota Teammate (Advanced driver support)**
  - Toyota Teammate is an advanced driver support system developed based on Mobility Teammate Concept™. It is now available on models in the popular price range to further contribute to a safe society.

- **Toyota Safety Sense (TSS)** has been installed in more than 32.5 million vehicles globally since it was launched on to the market in 2015 (figure as of July 2022).
- **TSS** is now available on nearly all passenger car models (as standard or option) in the Japanese, United States, and European Markets. It has also been introduced in a total of 120 countries and regions in major markets including China and other selected Asian countries, the Near and Middle East, and Australia.

---

*Note: The table and images are not fully transcribed due to the limitations of the transcription process.*
Passive Safety

**Aim**

- Minimizing collision damage by combining vehicle bodies that absorb the energy of collision with devices that provide support to protect drivers, passengers, and pedestrians.

**Initiative**

- GOA (Global Outstanding Assessment)
- Toyota’s unique, stringent internal targets related to passive safety performance.
  - Toyota has continued to advance GOA, continuously pursuing the real-world safety performance of its vehicles in a wide variety of accidents.

- THUMS (Total HUman Model for Safety)
- A virtual model of the human body jointly developed by Toyota and Toyota Central R&D Labs, Inc. to analyze injuries to the human body caused by vehicle accidents.
- The model is used to research and develop various safety technologies including safety devices such as seatbelts and airbags, and vehicle structures that mitigate injuries in accidents involving pedestrians.
  - In January 2021, Toyota made the THUMS software available on its website free of charge in the hope that as many users as possible will benefit from it.

**External Safety Evaluations (2021)**

---

**Emergency Response**

**Aim**

- Contributing to a reduction in traffic accident fatalities by facilitating the rapid response and the rapid rescue of people involved in traffic accidents.

**Initiative**

- HELPNET® service – Toyota’s emergency reporting system (Japan)
  - In the event of an accident or sudden illness, a dedicated operator contacts police, fire, or ambulance services to ensure the rapid dispatch of emergency vehicles.
  - When airbags deploy, vehicle data is automatically sent to the HELPNET center to assess the situation inside the vehicle. This system is compatible with the D-Call Net® system in Japan that sends data to hospitals or fire departments to facilitate rapid decisions to dispatch ambulances or other support.

HELPNET®<sup>[Airbag-linked Type] Illustration</sup>

- Automatically notifies when airbags are deployed
- Sends vehicle data such as position
- Dispatches air ambulance if needed
- Dispatches doctor to site
- Sends injury extent data

HELPNET®*6 Service
D-Call Net® System

*6 Air ambulances may not be available due to location, time of day, weather, etc. D-Call Net® will not respond when the HELPNET® button is pressed
*7 HELPNET® is a registered trademark of Japan Mayday Service Co., Ltd. D-Call Net® is a registered trademark of HEM-Net (Emergency Medical Network of Helicopter and Hospital)
Automated Driving Technology

Aim

- Achieving a society where everyone, including elderly people and people with disabilities, can enjoy mobility safely, smoothly, and freely using automated driving technology.

Initiative

Development of Automated Driving Technology

- Began implementing research and development into automated driving technology in the 1990s.
- Toyota's unique approach to automated driving, known as the "Mobility Teammate Concept", seeks to create a friendly relationship between people and vehicles that allows them to communicate and assist each other.
- Automated driving technology is not intended to take driving away from humans or replace human drivers. Instead, it is designed to achieve true safety, peace-of-mind, and freedom of mobility by establishing people and cars as trusted partners that can share the joy of driving, and take over driving duties as necessary.
- Toyota is advancing R&D into automated driving technologies not only for personally owned vehicles (POVs), but also in the field of mobility as a service (Maas).
- One of the first companies to launch advanced automated driving technology into the market for vehicles sold to corporate customers.
- Data collected from these vehicles will then be collected, analyzed, and fed back to development to further evolve automated driving technologies for POVs.

Models Equipped with Advanced Driver Support Technology

- Lexus LS and Mirai models launched in April 2021 are equipped with the new Advanced Drive function integrated into the Lexus Teammate or Toyota Teammate advanced driver support technologies.

Technology Details

- Advanced Drive for Driving Support on Highways
  - The on-board system will appropriately detects the vehicle’s surrounding, make decisions, and assist driving under the driver's supervision according to actual traffic conditions. It can keep the vehicle in its lane, maintain the distance from other vehicles, navigate a lane split, change lanes, and overtake other vehicles until reaching the roadway for the destination.
  - The system achieves high levels of safety and peace-of-mind, reducing driver fatigue and providing a pleasant journey to the driver's destination.

- Deep Learning-Focused AI Technologies
  - Supports driving by predicting and responding to a wide variety of situations that could occur when driving.

- Software Updates
  - Even after the vehicle has been delivered to the customer, the system continues to add features and improve performance to enhance the driving experience and provide the latest safety technologies.

Initiatives to Improve Traffic Safety Awareness

Aim

- Implementing educational initiatives to raise awareness among drivers and pedestrians and prevent traffic accidents.

Initiative

(Toyota Motor Corporation)

Fundamental Approach

Aim

- The quality of the work performed by each employee provides the foundation for the quality of our products and the quality of our sales and service. The combination of these three elements allows Toyota to provide products and services that our customers can use with confidence.

Initiative

- Individual employees involved in each process including development, purchasing, production, sales, and after-sales service, integrate quality into their work. Each process is linked with other processes to maintain the momentum of the quality assurance cycle.

Initiatives Based on the Quality Function Policy

- Each year, Toyota formulates a policy to address company-wide quality issues and ensure quality corresponding to new business ventures and new technologies. This policy is then deployed globally.
- The policy is also shared with affiliated group companies and suppliers to promote collaborative actions for ensuring quality.
- Information about initiatives implemented under the policy is reported to senior management, including directors.

Organizational Structure

Aim

- Promote regionally-led quality improvement activities so that decisions and taking actions are made as close as possible to local customers.
- Be attentive to the increasingly diversified mobility needs of our customers and guarantee the quality of customers’ experiences (quality of experiences) obtained through mobility services.

Initiative

- Appointment of a Global Chief Quality Officer (G-CQO) in charge of global quality assurance and Chief Quality Officers in charge of quality in each region of the world.
- Quality Function Board: Discussion and decision-making on quality-related policies and important issues.
  - Participants: Company presidents and officers of relevant groups
  - Several times a year, CQOs from each region gather together to evaluate the achievement of the targets stipulated in quality function policies. New policies and target are then discussed and determined based on these evaluations.
  - Each region has a variety of quality-related conferences. Meetings chaired by regional CQOs are attended by the Global CQO or a member of the administration at Toyota Motor Corporation to facilitate further communication and collaboration.

Global Policy Implementation Structure and the Quality Conference

- Our company will guarantee: (1) the quality and security of our telecommunications that allow vehicles to connect to people, things, and cities; and (2) the quality of the information telecommunications platforms and servers that are used to operate our services.
- A review of our quality assurance regulations is being implemented and making company-wide efforts to strengthen the quality assurance process.
Product Safety Initiatives

**Aim**

- Engaging in car manufacturing while giving due consideration to safety and security throughout the entire process from design to production. In addition to achieving regulatory conformity in each country, we listen to the voices of customers around the world and utilize their opinions to make ever-better cars.

**Initiative**

- Development phase:
  - Maintaining our constant pursuit of world-class reliability and durability
  - Setting targets geared to vehicle longevity through, for example, surveying the environments where our vehicles are used and analyzing recovered parts.
  - Carrying out durability tests based on Toyota standards.
  - Incorporating fail-safes to ensure that customers can stop and evacuate from a vehicle safely in the event of a failure. Development to ensure customer peace-of-mind by defining quantitative indices of vehicle behavior that might make our customers feel uneasy.

- Production phase:
  - With regard to equipment, operations and inspections at plants associated with product safety, including our supply chain, we visualize how the equipment is managed and how the operations and inspections are conducted. Through particularly focused management, we make sure to prevent problems.

- Organizational Enhancement:
  - Appointment of a Regional-Product Safety Executive (RPSE).
  - Develop quality risk management structure that represent the voices of local customers.

- Auditing:
  - Conducting internal audits at each plant at least once a year to further enhance proper quality assurance activities in accordance with the laws and regulations of each country as well as our internal rules.
  - Our auditing teams are comprised of internal auditors with comprehensive knowledge of ISO 9001, Toyota’s quality assurance rules and systems, and various auditing methods. These teams conduct audits focusing on audit points that have been determined based on internal and external changes to the business environment, quality indicators, and other factors.
  - Audit results are shared with relevant parties so that improvement measures can be implemented promptly.
  - Toyota listens sincerely to the opinions of third parties, including the certification organizations of each country, and reflects them in the enhancement of our quality assurance activities.

- Initiatives with Suppliers:
  - Working in close cooperation with suppliers to ensure the level of quality that Toyota aims to achieve.
  - New suppliers:
    - Before doing business with a new supplier, we confirm the technical capabilities of the supplier (including their design development and quality management capabilities) to create a firm foundation for ensuring quality.
  - Existing suppliers:
    - Toyota provides suppliers with manuals compiling the necessary actions to be taken by the suppliers and Toyota as well as checklists for self-inspection of the quality management structure and production processes, for every stage from production preparation to mass production, specifying the actions that need to be carried out by both Toyota and the supplier.
    - Inspection results and improvement plans are also confirmed by Toyota on a regular basis.

Quality Risk Management

**Aim**

- Sharing information about quality risks worldwide, implementing proper actions from the standpoint of local customers, and ensuring streamlined responses to emergencies on a global scale.

**Organizational Enhancement**

- Fostering Quality-oriented Awareness and Culture

**Initiative**

- Developing human resources and improving work quality

**Customer Quality Learning Centers**

- Established in 2014, the Customer Quality Learning Centers are educational facilities for conveying the experiences and lessons Toyota learned from the series of recall issues to future generations of employees.
- The Center is updated every year to reflect recent issues to ensure that the lessons learned are not forgotten.
- Customer Quality Learning Centers unique to individual plants and overseas sites have also been established, and they are working to ensure employees in each region and each plant thoroughly understand the importance of quality.
- As of FY2022, 12,840 employees have participated in activities at our Centers (within Toyota Motor Corporation).

**All-Toyota TQM Convention “Akio Toyoda’s Roundtable on Quality”**

- Established in 2010, Toyota Restart Day is February 24 designated as Toyota Restart Day after President Akio Toyoda attended a US Congressional hearing on that data in relation to a series of recalls in 2010. Toyota is committed to creating better mechanisms and carrying out awareness-raising activities to ensure that the lessons learned from this experience are never allowed to fade away.
- February 24 was designated as Toyota Restart Day after President Akio Toyoda attended a US Congressional hearing on that data in relation to a series of recalls in 2010.
- Toyota is committed to creating better mechanisms and carrying out awareness-raising activities to ensure that the lessons learned from this experience are never allowed to fade away.
- President Akio Toyoda held a roundtable with employees in 2021 to communicate his commitment to quality and the values he promotes.
- The event was a dialogue open to all employees who wished to hear him speak, regardless of their rank or job description.
- 5,000 employees participated in the event (including remote participants from dealers, suppliers and Toyota Motor Corporation).
Coping with Quality Problems

Aim
- Early detection and rapid resolution of quality-related issues to ensure that our customers can use our vehicles safely.
- Ensuring constant legal compliance and making recall decisions from the customer’s perspective, putting safety and assurance first and making it possible to implement rapid responses and minimize inconvenience to the customer.

Initiative
- Recall decision-making process
  - Clarifying response procedures and persons in charge based on internal rules.
  - Feedback from customers in the region is always reflected in responses, and regional representatives located closest to the customer are also involved.
- Responses when a recall has been made
  - The customer’s safety and security will be our highest priority and the following steps will be taken to ensure rapid repairs and encourage customers to bring their vehicles in for repairs:
    - Notification will be sent in a prompt and fair manner by postal mail to customers who own vehicles covered by the recall. Dealers will also contact customers, if necessary.
    - Recall information will be posted on the company’s website on the same day as the recall notification.
    - We also make the required reports, including notifications to the authorities in accordance with the laws and regulations of each country, and report the ratio of the number of repaired vehicles to the number of recalled vehicles.

After-sales Service

Aim
- Providing continuous safety, peace of mind, and comfort to customers through regular servicing, legally mandated vehicle inspections, and repairs following breakdowns or accidents, enabling customers use their vehicles for many more years than they did before.

Initiative
- Providing more precise, more rapid, and more reasonably priced services through Toyota’s 3S Spirit (Seikaku + Shinsetsu = Shinrai: precise and courteous service creates trust).

*1 The figures above include recalls that cover multiple countries and regions, therefore totals for recalls and units in each country/region may differ from global figures.
*2 Scope of recalls listed above: Toyota or Lexus branded vehicles for which Toyota Motor Corporation has issued a recall notice (including OEM by Toyota Motor Corporation).
Customer Feedback System

**Aim**

- Our Customer Assistance Center provides **prompt, accurate, and courteous responses** based on our Customer First principle. Customer feedback and information from dealers is accepted with honesty and humility, and such information is used to create Ever-Better Cars, Sales, and Service.

**Initiative**

- Establishing Customer Assistance Centers at Toyota distributors all over the world, including in the United States, Europe, and Asia.
- Toyota Customer Assistance Center (Japan)
  - The Toyota Customer Assistance Center, the Lexus Information Desk, and the Lexus Owners Desk are available to respond to customer inquiries. (The Center’s sign language interpreter service began in February 2022)
  - Inquiry Line for Dealers (Japan)
  - The Salesperson Support Desk, an inquiry line especially for sales staff at Toyota dealers, has been established within Toyota Motor Corporation and provides support for staff to implement Customer First responses.
  - Customer feedback received through our Customer Assistance Center and Salesperson Support Desk is used in activities to create Ever-Better Cars, Sales, and Service.

**Customer Feedback Flowchart (Japan)**

### Internal Awareness-Raising Activities (Toyota Motor Corporation)

#### Initiatives related to Customer's Month

- A range of activities are carried out within the company to establish the Customer First approach

#### Experience and learn from customer feedback

- Employees visit our Customer Assistance Center to learn about how it functions
- A Customer Feedback Board has been made available on the company’s intranet to inform employees about recent feedback from customers

#### Consumer Affairs Advisor qualification

- Our company actively encourages employees to obtain the Consumer Affairs Advisor qualification, which is certified by the Japanese Prime Minister and the Minister of Economy, Trade and Industry.
- Employees who acquire this qualification become part of the Toyota Consumer Affairs Advisor Group which carries out evaluations of facilities and vehicles from the customer’s perspective

---

**Customer Assistance Center**

- The Toyota Customer Assistance Center, the Lexus Information Desk, and the Lexus Owners Desk are available to respond to customer inquiries.
- The Center’s sign language interpreter service began in February 2022.

- Japan Service Division
Fundamental Approach

**Aim**
- Protect information assets and ensure the safety and security of our customers from the threats and risks of cyber attacks, which target confidential corporate information and information systems, the networks of systems that control plant facilities and vehicles (such as on-board device systems), and even supply chains.

**Initiative**
- Based on the Information Security Policy, Toyota Motor Corporation and its consolidated subsidiaries work together to prevent information leaks.

Information Security Policy

Organizational Structure

**Aim**
- Share and discuss details of activities in each security field and overall common issues.
- Ensure readiness for potential cases of serious incidents.

**Initiative**
- Hold Information Security Management Meetings under the Chief Information & Security Officer (CISO) and security officers are assigned to individual security fields.
- If a serious incident occurs:
  - Promptly confirm the facts of the incident → Report to management, including Board of Directors → Analyze the causes and take countermeasures
Information Security Measures

Initiatives at Consolidated Subsidiaries, Dealers, and Car Rental Companies

- Promoting level-up activities based on the ATSG like at Toyota Motor Corporation.
- Toyota Motor Corporation’s specialized team carries out on-site audits of consolidated subsidiaries, dealers (Japan), and car rental companies (Japan) (to check responses to ATSG and the status of implementation of physical security measures).

Process of ATSG inspection and audit

1. Request for ATSG introduction/inspection
2. Self-inspection
3. Report of inspection results
4. Improvement advice and support
5. Improvement initiatives
6. On-site inspection of subsidiaries

Initiatives for Supply Chains

- In recent years, cyber-attacks targeting supply chains have been increasing. (Hacking and ransomware attacks actually happened to suppliers.)
- Establish a structure for security measures of supply chains and implement initiatives to reinforce security of the entire automotive industry.
- Promote initiatives using JAMA/JAPIA Cybersecurity Guidelines, the standards of the industry, for suppliers

Preventing leaks of confidential information and protecting information assets from cyber attacks.

Initiative

Aim

• Preventing leaks of confidential information and protecting information assets from cyber attacks.

Initiatives in Toyota Motor Corporation

• Level up activities based on All Toyota Security Guidelines (ATSG)

Complied/reference guidelines

- ISO 27001/27002
- US National Institute of Standards and Technology (NIST) Cybersecurity Framework
- Cyber/Physical Security Framework by the Ministry of Economy, Trade and Industry
- JAMA/JAPIA Cybersecurity Guidelines, etc.

Contents

- Organizational management measures
- Human resource management measures
- Technical management measures
- Physical management measures
- Establishment of incident/accident response

Self-inspection based on ATSG

- Once a year

Major Activities for Information Security Education

• Carrying out activities, which all employees are required to take part in, to raise awareness in Information Security Reinforcement Month (twice a year).
• Displaying educational or warning information at startup of personal PCs.
• Providing information security training for new employees and special training when a new law is enforced to ensure information is distributed in a timely manner (e-learning).
• Sending targeted-attack-type emails without notice to all employees, including executives. (once or twice each year)

Preparing for Information Leaks and External Attacks

Aim

- Preparing for potential cyber-attacks to company information asset, information system, networks of systems that control plant facilities and taking proper and prompt action in case of a serious issue.

Initiative

• Information gathering and monitoring by a specialized team
  • Share information on security threats with each regional headquarters. Regional headquarters ensure that the information is shared within the region and promptly take necessary measures.
  • Conduct training
    • Assuming increasingly complex and sophisticated cyber-attacks, the specialized team conducts training at least once a year and prepares scenarios for early recovery to be prepared for a large-scale issue.
  • Third-party evaluations
    • Regarding the status of security measures for management and technical aspects of internal security systems, receive third-party evaluations based on NIST SP800-82/53, ISO 27001/2, IEC 62443, etc. For the problems pointed out, implement necessary measures to raise the security level.
  • Response to serious incidents
    • Formed a response team including members in management positions (TMC-SIRT*) to settle the situation properly and promptly.

* Toyota Motor Corporation-Security Incident Response Team
Security for Automobiles

Aim

• Ensure safety of customers with the world's top-level countermeasures.

Initiative

• Compliance with international regulations and standards
  In addition to compliance with the international rules and standards below, implement initiatives for the entire vehicle life cycle, such as development in consideration of security by design*1 and layered defense*2 and gathering and monitoring of information on threats and vulnerabilities.
  • United Nations regulations concerning automobile cyber security (UN R155*3).
  • International standards concerning cyber security of electrical/electronic systems of automobiles (ISO/SAE 21434).
  • Be a member of the Automotive Information Sharing & Analysis Center (Auto-ISAC) in Japan and the U.S.
  • Learn promptly about cases that occur within the industry and put them to use in responding to serious incidents.
  • Implement measures to enhance capabilities of the entire industry to tackle security issues.

• Collaboration with external specialists
  • By proactively collaborating with external specialists, utilize external know-how to enhance cyber security of automobiles.
  • Introduce a vulnerability reporting system to clarify the contact point for reporting security problems from outside.

*1 Security by design: Design approach that defines the security requirements needed for safe system operations, beginning from the planning and design phases of an information system, and which aims to reliably incorporate these requirements into the information system through the development processes, moving away from the approach of implementing security countermeasures only after a problem has been discovered.

*2 Layered defense: Security practice of combining multiple defense "layers" to enhance security so that an attack is not successful even if one layer is penetrated.

*3 UN R155: Regulations concerning cybersecurity, which were adopted at the World Forum for the Harmonization of Vehicle Regulations (WP29) in June 2020.
Fundamental Approach

Aim

- In line with Toyota’s Customer First philosophy, respect privacy as a member of the international community, through compliance with the laws and regulations of each country and region.
- Ensure appropriate management and correct utilization of information to contribute to creating Ever-Better Cars and enriching the lives of communities.

Initiative

- Establishment and Operation of a Privacy Governance System
  - Appropriate management and protection of personal information based on the Basic Policy on the Protection of Personal Information and the Privacy Code of Conduct.
  - Compliance with the Act on the Protection of Personal Information and other related laws and ordinances.
  - Utilization of information to solve social issues and provide ever-better products and services.

Organizational Structure

Aim

- Building a privacy governance structure applied throughout the company while integrating the perspectives of those outside the company.

Initiative

- Decision-making regarding important matters, policies, and specific measures at Privacy Governance Management Meetings under the supervision of the Chief Privacy Officer (CPO).
- Establishment of an Advisory Board
  - Reflecting advice based on the perspectives of external third parties, such as experts outside the company, into in-house initiatives.
- If a serious incident occurs, the nature of the incident will be promptly identified and reported to the CPO and members in management positions. The incident will then be analyzed to facilitate the implementation of responses.

Privacy Governance Management

- Meeting (Chairperson: CPO)
  - Decision-making regarding important matters, policies, and specific measures at Privacy Governance Management Meetings.
  - Establishment of an Advisory Board.
  - If a serious incident occurs, the nature of the incident will be promptly identified and reported to the CPO and members in management positions. The incident will then be analyzed to facilitate the implementation of responses.

Social Data
Respect for Privacy and Protection of Personal Information

Aim

- Carrying out duties and developing human resources with awareness of the need to respect privacy and protect personal information.

Initiative

Compliance with Laws, Ordinances, and Internal Regulations

- The Privacy Code of Conduct, based on the Toyota Philosophy and Toyota Way 2020, clarifies Toyota’s aims for the handling of information that includes personal information, as well as the direction that should be taken by the company and each employee.
- Necessary procedures including the gathering, utilization, and management of personal information are stipulated and operated in accordance with company regulations, while also complying with the laws and regulations of each country and region such as GDPR*1 (Europe) and CCPA*2 (California, USA).
- Information that requires more secure handling will undergo a risk assessment in advance to facilitate the implementation of appropriate measures.

*1 GDPR: The EU General Data Protection Regulation
*2 CCPA: The California Consumer Privacy Act

Training

- Implementation of training to suit each job type and job description.
- In-house awareness-raising activities for all company employees during Privacy Month (once a year).
- Implementing training for new employees and on-demand training.
- Special training sessions will be carried out when a new law comes into force or an existing law is revised to ensure that the relevant information is disseminated throughout the company in a timely manner.

Privacy Code of Conduct (Excerpt)

(What Toyota employees should strive for)
We will comply with laws and regulations when handling personal information. We will respect privacy. In addition, in order to provide products and services that delight our customers through the appropriate handling of information, we will establish a sustainable and superior information management system and aim to be a company that sets a global standard.

Rules for the Handling of Personal Information

Customer first
- Listen to customers’ voice carefully and sincerely.

Quality first
- Respect customers’ privacy in the development and operation of products and services. (Privacy by design)

Product and Experience
- When using customer-related information, create services and products that suit each individual customer to achieve customer happiness.

Compliance
- Information management based on complying with laws and regulations

Stakeholder
- Cooperation with our stakeholders to respect our customers’ privacy and comply with laws and regulations

Human resource development
- Achieve a high standard of privacy governance
**Fundamental Approach**

**Aim**
- Protect and utilize intellectual property such as invention, know-how and brands, which are Toyota’s important management resources, in an appropriate manner. Endeavor to conduct research and development that is one step ahead, thereby enhancing product appeal and technological prowess, which are the source of Toyota’s competitiveness.

**Initiative**
- Carry out intellectual property activities in line with Toyota’s focus areas, toward the realization of a future mobility society.
- Distribute resources mainly to such areas as carbon neutrality, including the development of electrified vehicles and batteries, and Software & Connected Initiatives. Enhance the obtainment and use of intellectual property rights.

---

**Organizational Structure**

**Aim**
- Promote activities that incorporate management, R&D, and intellectual property in one.

**Initiative**
- Support technology development globally by securing organic, systematic coordination between R&D activities and intellectual property activities.
- Establish intellectual property functions at the R&D centers in Japan, the United States, Europe, and China.
- Discuss and make decisions at the Intellectual Property Management Committee on policies for obtaining and utilizing important intellectual property conducive to management and for responding to management risks related to intellectual property.
- Work in collaboration with approximately 110 law firms around the world to collect intellectual property information and take measures suitable for each country/region.

---

**Intellectual Property Activities**

**Aim**
- Protect and utilize Toyota’s intellectual property, including invention, know-how, and brands, in an appropriate manner.

**Initiative**
- Number of patents held by Toyota in major countries around the world: Approx. 69,000 (as of March 2022)
- Toyota is filing approximately 14,000 patent applications a year in Japan and overseas.
- It held the most patents among car manufacturers in Japan, the United States, and other countries (in 2021).
- It has been ranked top in the ranking list of companies filing patent applications concerning decarbonization-related technologies to the Japan Patent Office, which was released by an external institution.
Fundamental Approach

**Aim**
- Develop human resources based on the belief that “monozukuri (manufacturing) depends on human resource development.”
- Develop human resources with the ability to continuously think and act for the benefit of others and to win supporters in order to advance transformation into a mobility company and fulfill the corporate mission of “Producing Happiness for All” in face of the once-in-a-century transformation period.

**Initiative**
- Develop companywide human resources with compassion* and expertise that have a positive impact on others and are capable of winning trust and confidence along with the “ability to act” to move things forward.
- Promote skills development and ensure the placement of the right person in the right position by identifying the roles and abilities of each individual regardless of their nationality, gender, year of employment, type of employment, academic background, occupation, etc.
- Initiatives supporting Toyota’s transformation into a Mobility Company
  - Promptly shifting resources from existing car manufacturing and sales businesses to new areas such as CASE and value chain.
  - Building a software development structure on a 3,000-person scale for Toyota, Woven Planet, and Toyota Connected and on a 18,000-person scale for the entire Group.
  - To achieve the above, expand the percentage of software personnel in mid-career hiring from 22% in fiscal 2019 to 50% in fiscal 2023, and further strengthen hiring of software personnel.
  - Creating an in-house development environment and reskilling education including dispatching personnel to different industries and supply chains.
  - Dispatch more than 400 people to Woven Planet and other software development areas, as of 2021.
  - Plan to increase the number of participants in reskilling education to 9,000 by 2025.

* Ability to make the best efforts for others, such as customers and colleagues, and to improve oneself from respectfully learning from others.

Recruitment

**Aim**
- Recruitment of diverse human resources with a greater emphasis on compassion and enthusiasm for realizing dreams at Toyota.
- Reinforcement of recruitment of personnel who are attractive for others to work with.
- Review of work processes and workstyles, incorporating external knowledge.

**Initiative**
- Enhancing mid-career recruitment
  - Before: 90% new graduates and 10% mid-career hires
  - Increase mid-career hiring from 10% to 39% (FY2022: Toyota Motor Corporation, administrative and engineering positions)
  - Increase to 50% in the medium term
  - Introduced recruitment methods such as referrals (recommended from employees).
- Hiring new graduates with diverse backgrounds
  - Promote recruitment of diverse people from universities from which no graduates have been hired by Toyota, technical colleges, vocational schools and high schools.
- Course specific recruitment of new graduates
  - Hire students who have a concrete vision of what they want to do at Toyota (termination of school recommendation program).
  - Promoting the recruitment of diverse human resources suited to the characteristics of specific workplaces, such as with IT related personnel.
Education and Career Development

**Global Executive Human Resource Development: “GLOBAL 21” Program**

- Develop human resources who can act in line with the Toyota Philosophy with the aim of transforming into a mobility company.

**TMC Human Resource Development**

**Management-level development**
- All personnel who are promoted to senior professional/senior management or professional/management undergo one-year, rank-specific training.
- General manager-class employees serve as instructors for group training and seminars that include discussions in small groups, with the aim of strengthening the culture of “learning and teaching.”
- Training is provided for performance review to improve evaluation and change skills.
- Toyota encourages the promotion of young employees to important positions.
- This creates opportunities for top management to directly observe personnel in these positions and to foster executive minds in the candidates.

**Administrative, Engineering, “Gyomushoku” Human Resource Development**
- OJT with a focus on genchi genbutsu (onsite, hands-on experience), and with OFF-JT.
- Toyota encourages the promotion of young employees to important positions.
- This creates opportunities for top management to directly observe personnel in these positions and to foster executive minds in the candidates.

**Shop Floor Employee Human Resource Development**
- OJT is conducted by supervisors and experienced employees at the worksite through daily operations in the field. Deployment cycle: formulation of development plans, assignment for development, and evaluation/feedback.
- While focusing on OJT, human resource development is accelerated by conducting OFF-JT at important stages in employees’ careers.
- To help employees quickly acquire new technical skills, we direct our energies into establishing a culture of human resource development and start-up seminars are also held to support transferred employees in efficiently acquiring work skills.
- Supporting aspiring employees through, for example, practical training at worksites and improving web learning programs for those wishing to grow through self-learning.
- Supporting diverse employees, including post-retirement career seekers after the age of 60, female shop floor employees, and persons with disabilities.

**Overseas Affiliate Human Resource Development**
- Temporarily transfer employees from overseas affiliates to Toyota Motor Corporation for OJT to promote self-sufficiency in overseas affiliates.
- Learn skills, know-how and Toyota’s way of thinking and work processes for 6 months to 3 years.
- General Manager-level:
  - Temporarily transfer employees from overseas affiliates to Toyota Motor Corporation for OJT to promote self-sufficiency in overseas affiliates.
  - Learn skills, know-how and Toyota’s way of thinking and work processes for 6 months to 3 years.

**Fundamental Approach**

- Teaching of management philosophy and what is expected of executives.
- Disseminating Toyota Philosophy and incorporating it into global human resource system and training.

**Human resource management**

- Applying appropriate personnel evaluation standards and processes in each region based on Toyota’s common values.

**Training deployment and training programs**

- Global assignments and executive training.
- Holding regional succession committees to accelerate identification and training of next-generation leaders.

Evaluation of and Feedback to Employees

**Aim**

- Developing human resources through evaluations and feedback based on close communication between employees and managers.

**Initiative**

- Determine roles and themes at the beginning of each fiscal year and consult with supervisors periodically.
- Promote human resource development through a cycle in which supervisors assess self-evaluations of their subordinates and provide feedback to them.
- Implementation of 360-degree feedback
  - Gather information on employees’ strengths and weaknesses and provide feedback to them.
  - Reflect half-year results into bonuses and full-year performance into salary raises for the following year.

</tr>
</tbody>
</table>
| 2020 | Introduced a system capable of centrally managing employees’ individual information, including employees’ evaluations, the results of consultations with their supervisors and questionnaire results regarding workplace management
  - This makes it possible to refer to previous evaluations, personal information and employees’ career goals. Enhance the development and allocation of human resources with consistency through job assignment based on a better understanding of employees’ aptitude and career goals |
| 2021 | Started providing feedback to senior professional/senior management or professional/management on the results of their evaluations |
| 2022 | Started providing feedback to assistant managers and those in ranks below (administrative, engineering, gyomushoku) on the results of their evaluations |

Employee Satisfaction Survey

**Aim**

- Conduct employee questionnaires as a starting point for each employee to act based on the idea of creating a work environment where each employee can maximize his/her ability.

**Initiative**

- Use Employee Satisfaction Survey analysis for planning and implementing measures to make a better workplace.
- Share feedback results in the workplace to promote dialogue and improve activities in each organization.

**Fundamental Approach**

**Aim**
- Create workplaces that ensure the physical and mental well-being of all people working at each Toyota location, providing a safe environment where everyone can work to their full potential.

**Initiative**
- Promoting health and safety initiatives for all on-site personnel including employees and contractors based on the following philosophy and policy:
  - Health and safety philosophy: Toyota Motor Corporation’s Declaration of Health Commitment and the Basic Philosophy for Safety and Health.
  - Health and safety policy: Health through mutual awareness-raising and the establishment and enhancement of a safety-focused work culture. This policy is expanded globally.

### Basic Philosophy for Safety and Health

- Safe work
- Reliable work
- Skilled work
- Safe work is “the gate” to all work.
- Let us pass through this gate.

</tbody>
</table>
Organizational Structure

Aim

- Promote better work environments through collaboration with the administrative divisions of offices, labor unions and business partners including suppliers, in-plant contractors and others.
- Promote initiatives based on daily collaboration, sharing and improvement of issues.

Initiative

- Person in charge: Company safety and health supervising manager (Chief Officer of the Production Group)
- The Safety and Health Function Policy and KPI are formulated in view of technological innovations and changes to the business environment.
- The results of health and safety promotion initiatives are reported to management together with figures related to diseases and accidents.
- The Safety and Health Promotion Division takes a leading role in building collaboration with administrative divisions of offices, labor unions, health insurance societies, regional affiliated companies, suppliers, etc.

Health and Safety Education

Aim

- Educate all employees, from new recruits to executives, to establish awareness of their individual roles in maintaining health and safety (every year).

Initiative

- Discussions about workplace management tips and examples
- Reaffirmation of the importance of daily communication
- Early identification of any health problems of their subordinates by managers, provide proposals to predict accidents before they happen, etc.

Company-wide Education Initiatives (Toyota Motor Corporation)

| Suppliers and Affiliated Companies | Educate all employees, from new recruits to executives, to establish awareness of their individual roles in maintaining health and safety (every year). |

Education Programs for Managers

- Discussions about workplace management tips and examples
- Reaffirmation of the importance of daily communication
- Early identification of any health problems of their subordinates by managers, provide proposals to predict accidents before they happen, etc.

Education Programs for Advancements

- Topics starting in new positions
- Rank-specific Education Programs

Sustainability Data Book 93
Initiative for Health

Aim

• Further promotion of lifestyle disease prevention, mental health, improvements to create better, more fulfilling work environments. By prioritizing health as our policy, we ensure that our employees can grow along with the company, and each employee can contribute to boosting the company’s overall productivity.

Initiative

Physical Examination and Health Guidance

• Carrying out physical examinations provided by full-time medical staff in accordance with each employee’s age and risk factors. Encouraging voluntary screening tests (neurological or gynecological tests, etc.) and providing specific health guidance.

• Once an employee turns 36 years old, the employee and their (dependent) spouse undergo a health screening equivalent to a thorough physical examination once every four years and attend health briefings about their individual health status. (approximately 20,000 persons undergoing screening per year at Toyota Motor Corporation)

• Individual guidance will be provided if the employee’s health does not improve after follow-ups within the company and/or outpatient treatment at a medical facility.

2021 Results (Toyota Motor Corporation)

</tbody>
</table>

**Examples of Three Pillars Initiatives**

- **Safe Work**: Employee movement zones and industrial vehicle movement zones are separated to prevent collisions between workers and industrial vehicles.
- **Safe Place Environments**: Heat mitigation is carried out by creating cool air flows throughout the worksite to improve the work environment.

**Initiative for Safety**

**Aim**

- Promoting safety and health activities rooted in each worksite toward achieving the target of “ultimately achieving zero accidents and the continuation of zero accidents at all worksites”.
- Scope: employees, secondees, assistant secondees, dispatched employees, employees of in-house contract companies, and employees of suppliers related to plant construction work, under the Occupational Safety and Health Rules.

**Initiative for The Three Pillars of Safety**

**The Three Pillars of Safety**

**Safe People**

- Promoting the development of human resources who are capable of predicting risks and thinking and acting in compliance with rules
- Workplace leaders demonstrate a safety-first attitude on a daily basis. Safety education focuses on the experiences and past actions of former employees, and is designed to encourage current employees to look at their awareness and behavior on a daily basis to ensure that all employees are “safe people.”

**Safe Work (Risk Management)**

- Reducing and managing high-risk tasks to eliminate all serious accidents
- Employees implement the 4S methodology: seiri (sorting), seton (straightening), seiso (cleaning), and seiketsu (clean). They also evaluate safety risks in the workplace before implementing standardization based on the workability of each task.

**Safe Place/Environments**

- Aiming to build positive and worker-friendly processes, find troubles and take quick decisions and actions
- The work environment, which is managed by statutory environmental measurement, is significantly affected by the production equipment, season and other factors. Therefore, measures for equipment are implemented according to the predetermined priority order
Safety Risk Assessment

- Global Roll-out of Occupational Safety and Health Management System (OSHMS)
  - Using OSHMS, weaknesses are identified by genchi genbutsu (onsite hands-on experience) inspections.
  - Confirming whether measures are being implemented to avoid accidents that have occurred at other affiliates, and that a system has been created to ensure efforts are active and continuing.
- Acquisition of ISO 45001 Certification
  - Eight global plants have acquired ISO 45001 certification (as of December 31, 2020). Further acquisition of certification by affiliates will be considered depending on the needs of the region and the plant concerned.
- Global Safety Meeting
  - Managers in charge of health and safety in each region attend a meeting (six times a year).
  - Attendees discuss responses to common issues and share examples of effective responses.
- When a new office is established, the company works together with suppliers to advance safety measures in terms of premises, buildings, and equipment installation while ensuring compliance with both legal requirements in the relevant country and construction work safety rules and equipment safety standards, both of which are common to global Toyota.

Initiatives to Create a More Worker-friendly Workplace Environment (Preventing Musculoskeletal Disorders)

- Enhancing initiatives to create workplace environments that are more friendly to workers in every region with consideration for all those involved in production activities, regardless of age, gender, or physical characteristics.
- Measures to prevent lower back and hand pain from repetitive tasks include easy-to-assemble components and worker-friendly production equipment and work methods. We also visualize the condition of employees by offering physical care to employees on-site and a system to provide support when pain occurs.

Social Contribution

Fundamental Approach

Aim

- Toyota actively promotes social contribution activities to contribute to sustainable social vitality by working with stakeholders and using its resources effectively, while concentrating on initiatives that address real social needs, including the need for fostering human resources.

Initiative

- For the issues in each contribution area, we will take action with a sense of ownership and genchi gengatsu (onsite hands-on experience) basis. We will work together with our partners who share the same aspirations in addressing issues that are difficult to solve solely by ourselves.

Basic Principles and Policies of Social Contribution Activities

Toyota Social Contribution Activities

Organizational Structure

Aim

- Promote social contribution activities and discuss and report activity policies.

Initiative

- The direction and challenges of sustainability initiatives are reported to and discussed at the Sustainability Subcommittee. Key issues are then reported to the Sustainability Meeting for consideration and decision making. (The Sustainability Meeting thus supervises Toyota’s sustainability initiatives.)

P.6 Promoting Sustainability

- The Corporate Citizenship Division plays the lead role in promoting activities in cooperation with regional headquarters in the United States, Europe, Asia and China.

Social Contribution Activities

Aim

- Contribute to achieving the SDGs by taking concrete actions from the perspective of “what we want to be like in the future.”

Initiative

- 4 areas in which Toyota will focus its efforts
  - Contribution to a harmonious society
  - Human capital development*
  - Community co-creation
  - Mobility for All (offer free and safe mobility for all people, through its business)

Example

- Social contribution programs (e.g. contribution to a harmonious society, human capital development and community co-creation)
- Promotion of employee volunteer activities (Toyota Volunteer Center)
- Support of activities by NPOs, NGOs, etc. (donations and sponsorship)
- Activities to promote understanding of automobile culture and Toyota corporate culture

Governance

101 Corporate Governance
104 Risk Management
108 Compliance
111 Governance Data
Fundamental Approach

**Aim**
- Establishment of a corporate governance structure that supports sustainable growth and the stable, long-term enhancement of corporate value.

**Initiative**
- Establishment and improvement of corporate governance structure and proper operation of the Board of Directors and the Audit & Supervisory Board, etc. to enhance corporate governance.

Corporate Governance Structure

**Aim**
- Put in place a structure that enables customer opinions and on-site information to be swiftly communicated to management in order to realize timely and accurate management decision-making, and to review whether such management decisions are accepted by the customers and society.

**Initiative**
- Together with the business units (in-house companies and Business Planning & Operation Units), the operating officers, mainly consisting of the president, executive vice presidents and chief officers, to whom authority is delegated by the Board of Directors, realize prompt decision-making and promote initiatives.

- The Board of Directors, which includes Outside Directors, and the Audit & Supervisory Board, which includes outside Audit & Supervisory Board Members, supervise and audit the execution of business operations.

### Board of Directors

#### Aim
- Carry out acceleration of decision-making and appropriate supervision to realize sustainable growth through transformation into a "mobility company".

#### Initiative
- Internal executives who have been long engaged in and have deep knowledge of manufacturing and outside executives who are capable of providing advice for the creation of new value from a broad perspective participate in well-balanced decision making at the Board of Directors' meetings.
- Establishment of "Executive Appointment Meeting" and "Executive Compensation Meeting," of which a majority of the members are Outside Members of the Board of Directors, in order to enhance the governance system.

#### Changes in Governance Structure

<table>

<td>3</td>
</tr>
</tbody>
</table>

#### Executive Vice President
- 2011-2020: between 4 and 7
- April 2022

#### Senior Managing Manager
- 64
- 2011-2016: between 42 and 49
- Postion newly established with revised roles (3 persons)

#### Operating Officers
- 2021/8: 7

#### Outside Directors
- 2011-2017: between 55 and 68
- In June 2022 organizational changes, outside directors changed from 66 to 67

#### Corporate Governance Structure
- 2017: Outside Directors (including Outside Directors) to 9 (June)
- 2018: 9 due to organizational changes

#### Composition of the Meetings
- Executive Appointment Meeting
- Executive Compensation Meeting
- Chairperson: Chairperson of the Board of Directors, 5 members (Independent Outside Directors: 3, Female: 1, Non-Japanese: 1)
- Executive Compensation Meeting
- Chairperson: Chairperson of the Board of Directors, 5 members (Independent Outside Directors: 3, Female: 1, Non-Japanese: 1)

#### Tenure as Director
- Average tenure: 7.6 years (0-4 years: 6 persons, 5-9 years: 1 person, over 10 years: 2 persons)

#### Summary of the findings
- Measures to make full use of the insights of Outside Members of the Board of Directors and Audit & Supervisory Board
- Review the criteria for submission of proposals to the Board of Directors as needed to reduce the number of proposals submitted, so that sufficient time can be assured to discuss each proposal
- Provide an explanation of all proposals in advance to help ensure thorough understanding of the background of the proposals
- Remove the time limit for discussions at Board of Directors meetings to ensure sufficient discussion can be held
- Besides the Board of Directors meetings, set periodic opportunities for two-way communication between Outside Members of the Board of Directors and the Audit & Supervisory Board and the operational execution side on important management issues and medium-to-long-term issues

#### Analysis/evaluation of the effectiveness of the Board of Directors
- Frequency: Once a year
- Subject of evaluation: Members of the Board of Directors and Audit & Supervisory Board Members
- Matters to be evaluated:
  - corporation and operation of the Board of Directors
  - management strategy and business strategy
  - corporate ethics and risk management
  - communication with stakeholders such as shareholders
- Method: Self-evaluation through surveys and interviews
- Summary of the findings: Enactment of the evaluation system for the effectiveness of the Board of Directors
- "Effectiveness is confirmed"
- "Further improvements to be made to secure more opportunities to discuss important topics, provide more information to Outside Members of the Board of Directors and Audit & Supervisory Board"
## Audit & Supervisory Board

### Aim
- Appropriately conduct audits of Toyota, which aims to achieve global sustainable growth by transforming itself into a “mobility company”.

### Initiative
- The Audit & Supervisory Board is composed of full-time Audit & Supervisory Board Members, who are well-informed of Toyota's internal matters, and Outside Audit & Supervisory Board Members, who have a high level of expertise and knowledge.
- Each Audit & Supervisory Board Member can exercise his/her audit & supervisory authority independently.
- The Audit & Supervisory Board is composed of full-time Audit & Supervisory Board Members, who are well-informed of Toyota's internal matters, and Outside Audit & Supervisory Board Members, who have a high level of expertise and knowledge.
- Each Audit & Supervisory Board Member can exercise his/her audit & supervisory authority independently.

## Executive Compensation

### Aim
- An important means to encourage executives to contribute to decision-making aimed at sustainable growth into the future, to transforming Toyota into a “mobility company”, and to resolving social challenges including the SDGs through various initiatives.

### Initiative
- Toyota’s executive compensation system is determined based on the following policy.
- It should be a system that encourages Members of the Board of Directors to work to improve the medium- to long-term corporate value of Toyota.
- It should be a system that can maintain compensation levels that will allow Toyota to secure and retain talented personnel.
- It should be a system that motivates Members of the Board of Directors to promote management from the same viewpoint as our shareholders with a stronger sense of responsibility as corporate managers.

### Remuneration system
- The Board of Directors decides by resolution the policy for determining remuneration for and other payments to each member of the Board of Directors.
- Remuneration is effectively linked to corporate performance while reflecting individual job responsibilities and performance.
- Remuneration standards in each member’s home country are also taken into account when determining remuneration levels and payment methods.
- Remuneration for Outside Members of the Board of Directors and Audit & Supervisory Board Members consists only of fixed payments. As a result, this remuneration is not readily impacted by business performance, helping to ensure independence from management.

### Remuneration for Directors
- Maximum cash compensation: 3.0 billion yen per year (of which, the maximum amount payable to Outside Members of the Board of Directors is 0.3 billion yen per year)
- Maximum share compensation: 4.0 billion yen per year

### Remuneration for Audit & Supervisory Board Members
- 30 million yen or less per month

## Internal Control

### Aim
- Establish a system for ensuring the appropriateness of business operations as a corporate group and the proper implementation of that system in accordance with the “Basic Policies on Establishing Internal Controls.”

### Initiative
- Integrate the principles of problem identification and continuous improvement into the business operation process and train employees who will put these principles into practice.
- Inspect the establishment and implementation of internal controls, each business year.
- Confirm that the organizational units responsible for implementing internal controls are functioning autonomously and are enhancing internal controls as necessary.
**Fundamental Approach**

### Aim

- Reinforcing our risk management to handle the increasing uncertainty while responding to expectations to take on new challenges amid a period of tremendous change in the conditions and values of the automotive industry, including the push toward carbon neutrality and CASE.

*CASE: Connected, Autonomous/Automated, Shared, and Electric*

### Initiative

- Protecting the interests of our stakeholders, including customers and employees, even in the event of a risk occurrence, through the improvement of the organizational structure and the operation of the risk management system.

**Organizational Structure**

### Aim

- Preventing, mitigating, and reducing risks that could arise in Toyota’s business activities from a global perspective through collaboration and mutual support among regions, functions, and in-house companies.

### Initiative

- Persons responsible for risk management: Chief Risk Officer (CRO), Deputy CRO (DCRO)
- Person supervising risk management in each region: Regional CRO
- Person responsible/in charge of risk management by function: Chief officer/risk manager of each division within the head office
- Person responsible/in charge of risk management by product: Company president/risk manager of each division in each in-house company
- Significant risks requiring quick response are reported by CRO and DCRO and discussed in the board meeting and/or other needed management meetings.
Risk Management System

**Aim**
- Identifying, assessing, and handling significant risks through the development of Toyota’s globally common risk management policy, structure, and operating procedures.

**Initiative**
- Estimating, identifying, and assessing risks in accordance with the Toyota Global Risk Management Standard (TGRS), a company-wide risk management framework based on the ISO and COSO (Committee for Sponsoring Organizations of the Treadway Commission).
- Advancing company-wide initiatives in terms of the following matters: climate change, natural disasters, and geopolitical conflicts to supply chains, business continuity management (BCM) at the head office, Toyota Group companies, and business partners to respond to a wide range of risks, cybersecurity risks, privacy protection, and internal control risks.

Business Continuity Management (BCM)

**Aim**
- Assure quick recovery in business operations despite limitations on resources in preparation for large-scale disasters such as earthquakes and floods.

**Initiative**
- Developing risk-resilient organizations and workplaces
  - Improving the effectiveness of the BCP by implementing PDCA through training and other means in coordination among employees and their families, Toyota Group companies and suppliers, and Toyota.
  - Developing risk-resilient individuals.

**Formulation of the Business Continuity Plan (BCP)**
- Developing risk-resilient organizations and workplaces
  - Improving the effectiveness of the BCP by implementing PDCA through training and other means in coordination among employees and their families, Toyota Group companies and suppliers, and Toyota.
  - Developing risk-resilient individuals.

Toyota’s Basic Guidelines (priorities during a disaster)
- In the event of a disaster, we support the recovery of local communities and then steadily resume in-house production while making the protection of employees’ safety the highest priority.

Toyota’s Basic Guidelines (priorities during a disaster)
- Humanitarian aid (rescuing first, relief)
- Early recovery of the affected areas (communities)
- Restoration of Toyota’s operations and production

Disaster risk reduction system and implementation of emergency drills
- Establishment of an initial response system divided into three levels: company-wide, office, and workplace levels.
- Through company-wide emergency drills (once a year), in which these three levels are linked together, and emergency drills held by each disaster risk reduction block organized at the office level, we work toward improving the accuracy and effectiveness of our initial responses.

**Organizational Structure**

- Company-wide initial response headquarters
  - Overseeing the company-wide disaster risk reduction system, gathering internal and external information in the event of an emergency, and determining response policies

- Disaster risk reduction block headquarters
  - Overseeing the block, gathering information about damage, supporting stranded commuters, operating a first-aid station, etc.

- Workplace disaster risk reduction team
  - Controlling the evacuation of the members of the workplace, giving first aid to the sick and wounded, first-aid firefighting, etc.
Utilization of the Safety Confirmation System

• In case that a large-scale disaster or incident occurs in Japan, the system enables employees working, living or staying in the affected area to report if they and their family members are safe to the company using their computers or smartphones.
• Conducting a safety confirmation drill for all employees every year in tandem with the company-wide emergency drill.

2021 results
• Safety reporting rate at company-wide drill: 99% (Toyota Motor Corporation)
• Enhancing awareness of disasters (Toyota Motor Corporation)

Distribution of the computer screen displaying information on workplace
• Discussions on simulations for disasters

Raising awareness by displaying information on computer screen
• Basic knowledge in consideration of recent years’ increased severity of extreme weather events
• The “Information for Severe Weather Preparedness” issued by the Japan Meteorological Agency, and evacuation information issued by the relevant local government
• How local residents should act and evacuate

Discussions at each workplace
• Discussions on simulations for disasters

Initiatives to Mitigate the Impact of Disasters on Buildings and Equipment

• We work to mitigate the impact of disasters on buildings and equipment in order to reduce any human injury and property damage in the event of a disaster and resume production immediately after shifting to the business restoration phase.
• Buildings: Our new buildings in Japan sufficiently meet the latest earthquake-resistance standards. Furthermore, each of our buildings built according to former earthquake-resistance standards has received earthquake-resistance testing and been retrofitted as needed.
• Production equipment and the like: We constantly identify hazards, such as collapse, fire and a loss of power in the event of a disaster, and risks that may affect manufacturing quality while taking work processes and the characteristics of the machinery into consideration. To eliminate the identified hazards and risks, we make continuous efforts to incorporate reasonable measures into equipment specifications and operational procedures.
• The know-how regarding the mitigation of the impact of disasters on buildings and equipment is being put to use in assessing risks and devising measures at affiliates in each country and region.

Humanitarian Aid and Early Recovery for Disaster-affected Regions

• Toyota has concluded comprehensive disaster support agreements with local governments (Toyota City, Miyoshi City, Tahara City, Hekinan City, and Susano City).
• Humanitarian support and regional recovery assistance are to be provided under mutual cooperation with local governments. Toyota is preparing relevant structures by incorporating necessary provisions in its BCP and conducting joint training with the local governments.
• Details of the major support items
  • Rescue and relief in a disaster
  • Provide temporary evacuation facilities to local residents
  • Provide food, drinking water, and daily necessities for distribution through local governments (local residents)
  • Support cargo handling at municipal relief supply facilities
  • Support for restoration of local infrastructure (water supply and drainage, roads, etc.)
  • Employee participation in local recovery activities

Building a Disaster-resilient Supply Chain

• Enhancing prompt initial action and early recovery
• Working with suppliers in each country and region to build a disaster-resilient supply chain and pushing forward the visualization of supply chain information and the implementation of measures as precautions against disasters even in normal times.
• Visualization of supply chain information: Building the RESCUE* system
  • Building a database based on highly confidential information from suppliers.
  • Conducting training with suppliers on a regular basis to ensure effective utilization of the system in the event of a disaster while strictly protecting suppliers’ confidential information.
  • This system is shared with other companies through the Japan Automobile Manufacturers Association, helping to build a disaster-resilient supply chain.
• Advancing equivalent initiatives together with suppliers in each country and region.

*RESCUE: REinforce Supply Chain Under Emergency

RESCUE System to Store Supply Chain Information

Toyota Motor Corporation

Registration of supply chain information

Sharing of supply chain information
Response to Infectious Diseases

- Infection prevention and support for frontline medical workers
  - We work to prevent infection and support frontline medical workers while placing the highest priority on the safety and security of our employees and their families, customers, suppliers, and other stakeholders.
  - The internal emergency headquarters takes various measures in line with the instructions of national and local governments in Japan and other countries/regions.
  - In preparation for any employee or anyone working with us being infected, a manual that indicates where to report the infection and the method of disinfection is distributed to all workplaces.
  - We examine and implement various measures that make effective use of our manufacturing and logistics know-how and the global supply chains of the automobile industry.

Fundamental Approach

Aim

• Carry out the Guiding Principles at Toyota* and fulfill the corporate social responsibility expected of Toyota.

* Honor the language and spirit of the law of every country and region, and undertake open and fair business activities to be a strong corporate citizen of the world.

Guiding Principles at Toyota

Initiative

• Formulation of the Toyota Code of Conduct that outlines the basic mindset that all members of Toyota should have and that shows concrete guidelines for the Guiding Principles at Toyota.

• Distribute the booklet to all employees, including secondees and dispatched employees, to ensure that they are thoroughly familiar with the Toyota Code of Conduct.

• Provision of various training and education programs, operation of the Speak up Hotline, and strengthening of compliance through checks.

• Appointment of Chief Compliance Officer (CCO) and Deputy Chief Compliance Officer (DCCO) (April 2022).

• Promote compliance activities to ensure that under the support and guidance of CCO and DCCO, all people working at Toyota act responsibly and in compliance with the Guiding Principles at Toyota, Toyota Way and the Toyota Code of Conduct.

Toyota Code of Conduct

Compliance Education

Aim

• Ensure that awareness of compliance extends throughout the company from top management to each employee.

Initiative

• For employees:
  • Familiarize employees with various laws and regulations that they must understand when carrying out their tasks.
  • The Business Compliance Seminar, in which lectures are given by the responsible division (held every year).
  • e-learning-based training.
  • Individual training courses tailored to specific needs of in-house divisions and subsidiaries in Japan.
  • Training at career milestones, such as at the time of joining the company, promotion and overseas assignment.

Major Training Themes

• Contracts • Antimonopoly Law • Subcontracting Law
• Act against Unjustifiable Premiums and Misleading Representations
• Insider Trading Regulations • Act on the Protection of Personal Information
• Intellectual Property (trademarks) • Product Liability Act • Taxation
• Confidentiality Management • Bribery/Corruption Prevention • Safety and Health
• Labor • Export Operations Management etc.

• For officers:
  • Thoroughly inform officers, including members of the Board of Directors, with basic matters that they must abide by.

Legal Handbook for Corporate Officers

• The Handbook explains the various laws, regulations and points that officers must observe while performing their duties. It provides a comprehensive explanation of how to prevent corruption, including regulations with regard to bribery/commission, insider trading, conflict-of-interest transactions and competitive transactions.

• The Handbook is posted on the company intranet for officers, and relevant explanations are provided for newly-appointed officers.

• The Handbook is revised annually to reflect amendments to the relevant laws.

Code of Ethics for Directors and Operating Officers

• It is a code of ethics that defines the basic matters that officers must comply with while performing their duties, together with internal regulations such as the Guiding Principles at Toyota and the Toyota Code of Conduct.

• It has been formulated by the Board of Directors and is thoroughly informed to officers.
Bribery / Corruption Prevention Measures

**Aim**

- Promote the eradication of bribery/corruption.

**Initiative**

- Formulation of Anti-bribery Guidelines (2012)
- Formulated the guidelines for internal divisions and for business partners.
- Anti-bribery Guidelines (For Business Partners)

**Guidelines for internal divisions**

- Prohibition of bribe public officials, etc.
- Prohibition of bribery/corruption of those who are not public officials
- Preparation and retention of accurate accounting records
- Reporting of improprieties when they are found
- Cooperation when investigations are carried out
- Points to follow when entering business partnerships (detailed audits, execution of contracts)
- Points to follow related to the payment of various expenses (gifts, donations, remunerations, etc.)
- Reporting impropriety when found/who to consult
- Penalties for violation and internal disciplinary measures

**Guidelines for business partners**

- Prohibition of bribing public officials, etc.
- Prohibition of bribery/corruption of those who are not public officials
- Preparation and retention of accurate accounting records
- Reporting of improprieties when they are found
- Cooperation when investigations are carried out

**Initiatives for Taxation**

**Aim**

- Conduct tax-related duties of high quality by maintaining compliance on taxation.

**Initiative**

- Formulation of the Toyota Tax Policy
- Communicate Toyota's stance on tax payment and taxation policy in an easily understandable manner and promote stakeholders’ understanding of it.
- Disseminate the Tax Policy to all subsidiaries.

**Speak-up**

**Aim**

- Quickly and appropriately respond to workplace- and duty-related concerns, complaints or questions that employees and other relevant parties may have.

**Initiative**

**Speak-up Hotline**

- In the past: Several hotlines were used depending on the type of issue, including a Compliance Hotline, which allowed employees to report compliance-related issues, and hotlines for harassment.
- At present: These hotlines have been integrated into the “Speak up” Hotline (since April 2020).

**Persons eligible to use the hotline**

- As long as the topics of the consultation are matters related to employees or workplaces of Toyota Motor Corporation, the hotline is open to not only its employees but also any other third parties, including employees' family members and business partners
- The hotline can also be used anonymously

**Methods for disseminating information on the hotline**

- Through various media including the intranet

**Handling**

- Applications for consultation can be made through a law firm, the website and by email or telephone. (Applications through the website and by email can be made on a 24-hour basis.)
- The content of a consultation is passed to the division responsible either anonymously or openly upon request and the details are investigated carefully to ensure that the person who voiced the concern is not identified if they wish to remain anonymous
- It is stipulated in relevant company regulations that unless the purpose is malicious, seeking a consultation through the hotline and taking other related actions will not disadvantage the person who voiced the concern
- For cases where an issue is actually identified, appropriate measures will be taken in accordance with company regulations such as the Work Regulations

**Number of consultations received (FY2022)**

- 727 (approx. 1.2 times the number the previous year)
  - Violation of laws, regulations and rules: 92
  - Financial wrongdoing: 3
  - Harassment: 229
  - Workplace environment/personal matters: 134
  - Opinions/inquiries: 136
  - Other issues: 143
Checks to Enhance Compliance

**Aim**

- Assess the compliance status of Toyota Motor Corporation and its subsidiaries in and outside Japan, and make improvements.

**Initiative**

- Select fields to be checked by making assessments of risk levels and importance for Toyota, and conduct checks. (Conducted every year)
  - For issues identified through checks and points that need to be improved, incorporate them into the next fiscal year’s action plans to ensure continuous attention and improvement.
  - Conduct interviews with subsidiaries to understand their compliance efforts and provide support when needed.

Checks carried out in FY2022

Checks in terms of compliance with the Antimonopoly Law, bribery/corruption prevention, violations of the Act on the Protection of Personal Information, etc.

**Activity**

- **Within Toyota Motor Corporation**
  - Individual divisions: Self-inspection
  - Self-inspection: Third-party audit
  - Support for improvement: Self-improvement
- **Subsidiary**
  - Distribution and collection of inspection areas
  - Self-inspection: Third-party audit
  - Support for improvement: Self-improvement
- **Second-tier Subsidiary**
  - Registration and collection of inspection areas
  - Self-inspection: Third-party audit
  - Support for improvement: Self-improvement

**Toyota Consolidated Helpline**

- Employees of Toyota’s subsidiaries in Japan and their family members may use this hotline as an option other than the hotline of their own companies when they have compliance-related questions regarding their companies. (The Helpline is run by an outside law firm as a subcontractor.)

**Report and response procedures**

- Holding of consultation and confirmation of the contents
- Investigation into the details (taking of evidence, interviews with parties concerned, etc.)
- Judgment on whether or not the claimed violation of law, harassment or the like was the case
  - An issue is identified.
  - No issue is identified.
- Corrective action, recurrence prevention measures, etc. against the violation
- Provision of feedback to the person who voiced the concern (except in the case where the person who voiced the concern is unknown or does not wish to receive feedback)

### 2. Strategy

- **G102-14**: Statement from senior decision-maker
  - Message from Management
- **G102-15**: Key impacts, risks, and opportunities
  - Climate-related Financial Disclosures Based on TCFD Recommendations
  - New Vehicle Zero CO2 Emissions Challenge
  - Plant Zero CO2 Emissions Challenge
  - Life Cycle Zero CO2 Emissions Challenge
  - Challenge of Minimizing and Optimizing Water Usage
  - Challenge of Establishing a Recycling-based Society and Systems
  - Challenge of Establishing a Future Society in Harmony with Nature
  - Form 20-F "KEY INFORMATION"

### 3. Ethics and integrity

- **G102-16**: Values, principles, standards, and norms of behavior
  - Vision & Philosophy
  - Toyota Earth Charter
- **G102-17**: Mechanisms for advice and concerns about ethics
  - Compliance

### 4. Governance

- **G102-18**: Governance structure
  - Corporate Governance
  - Promoting Sustainability
- **G102-19**: Delegating authority
  - Promoting Sustainability
Executive-level responsibility for economic, environmental, and social topics

Consulting stakeholders on economic, environmental, and social topics

Composition of the highest governance body and its committees

Chair of the highest governance body

Nominating and selecting the highest governance body

Conflicts of interest

Role of highest governance body in setting purpose, values, and strategy

Collective knowledge of highest governance body

Evaluating the highest governance body’s performance

Identifying and managing economic, environmental, and social impacts

Effectiveness of risk management processes

Review of economic, environmental, and social topics
