COROLLA

Sustainable Plant Activities

[Toyota's Sustainability Initiatives]

Products : Sustainable mobility

Monozukuri : Sustainable plants

Social contribution : Sustainable activities that contribute to the welfare of people and society

Announced on July 23, 2007
Goal of existing harmoniously with the local area and society through “three sustainability” initiatives

TMC has positioned the Tsutsumi Plant, which produces the Prius and is actively implementing environmental preservation initiatives, as a model plant

[Three main pillars]

[Eco-thinking]

Beautification activity

Improve the environmental awareness of employees and develop them into people who can take ecological actions voluntarily

[Renewable energy]

Photovoltaic generation

2000kw

Build an earth-friendly plant that utilizes renewable energy

[Plant forestation activities]

Tree-planting activities

2008.5.18

Tree planting event to plant 50,000 trees with 5,000 participants

Promote the building of a plant rich in greenery, with the goal of creating “a production plant within a forest”

[Interacting with local residents]

From rice planting to rice cake making

Community eco tour

Emergence of a firefly

(2010.6.22)

[Daily kaizen activities]

Continue to carry out straightforward energy conservation activities such as waste reduction

Zero landfill waste achievement(1999/10)
Zero incineration waste Achievement (2008/4)

Proposals for reducing energy usage

Resource sorting

December 2015
